

Natural Capital Securities™

Advisory Program

*Turning Environmental Impact
into Regulated Securities*

Overview: Natural Capital Securities™(NCS) Program

The Natural Capital Securities (NCS) Program converts high-integrity environmental projects into regulated financial instruments issued through Entoro's broker-dealer platform.

Each transaction uses a standardized SPV, legal templates, and CUSIP/ISIN-eligible securities, bringing carbon, methane, biodiversity, and water projects onto institutional balance sheets.

What is the NCS Advisory Program?

The NCS Advisory Program empowers qualified firms and professionals to originate and manage projects through the NCS onboarding process. Advisors handle all non-securities facilitation: coordinating diligence, organizing documentation, and preparing issuers for rating and issuance while Entoro manages structuring, placement, and compliance.

Advisors are key partners in expanding the global NCS pipeline, sourcing new issuers, guiding them through readiness, and helping turn environmental impact into investable securities.

Advisor Role

- Identify and onboard qualified issuers (corporates and/or developers).
- Lead intake calls, manage action lists, and coordinate with the issuer and Entoro's central team.
- Follow Standard Operating Procedures and compile diligence materials.

Benefits

- Full access to Entoro's standardized tools, templates, and back-office support.
- Co-branding and visibility as part of the global NCS Advisory Network.
- Opportunities to expand client reach in emerging carbon, biodiversity, and natural-capital markets.

Join the NCS Advisory Network

Work directly with Entoro's NCS team to bring environmental projects into institutional finance.
