

Natural Capital Securities

OVERVIEW

Entoro's Natural Capital Securities Program is a turnkey securitization platform that transforms environmental outcomes into regulated, institutional-quality financial instruments.

The program provides a faster, lower-cost pathway for corporates, sovereigns, and project developers to monetize natural capital assets through CUSIP/ISIN-enabled securities with sovereign authorization using capital markets infrastructure.

Seeking qualified issuers, project sponsors, and sovereigns to issue Natural Capital Securities backed by carbon, methane, biodiversity, water, or other verified environmental outcomes.

Highlights

- ✓ **Turnkey issuance platform:** Structured pathway from intake to issuance in under one month (subject to issuer readiness)
- ✓ **Capital markets access:** CUSIP/ISIN-tagged securities designed for institutional access and transfer
- ✓ **Lower lifecycle cost:** Approximately 70% less expensive than legacy VCM issuance approaches
- ✓ **Recognized assets, not offsets:** Designed for enforceability, transparency, and balance sheet recognition

Value Proposition

- ✓ **Balance sheet eligible asset:** Held as a financial asset, available for valuation, collateral use, impairment treatment, and institutional reporting
- ✓ **Compliance-driven demand:** Aligned with Paris Agreement Article 6, CORSIA, Scope 3 strategies, and other compliance schemes
- ✓ **Reduced diligence time:** Standardized legal agreements and documentation streamline review for corporate buyers and institutional investors
- ✓ **Repeatable financing channel:** Scalable access to capital beyond traditional voluntary carbon markets

Timing

- ✓ **Target Close:** Issuances beginning Q2 2026

Status: Onboarding selective projects
