● Design Projects

Project Manager @ **Seattle Children's Hospital**

A 3-month project supports Technology-Based Skill-Building for Youth Patients

Mar 2022 -Now • Seattle, Washington

Conducted multiple interviews with therapists and Ripple Effects team to come up with Activity Diagrams and User Flows to show incorporation of software into patient regimen. Created an ER diagram of variables to pull on the “dose” of computer-based therapy to record patient's development in the program.

Project Manager Intern @ **InternHacks**

A seven-week program that combines a tech internship and a hackathon

Summer 2021 • Seattle, Washington

Led a team of 4 individuals including engineers and designers to develop a Website that helps analyzing datasets to address Algorithmic Bias in ML/AI using HTML/CSS/Flask. Created webapp wireframes, prototypes and development of the MVP in 7 weeks.

● Work Experiences

UX Design Intern @ **UW-IT AXDD Team**

Central IT organization for UW, providing technology support to all campuses.

Summer 2021 - Now • Seattle, Washington

Collaborated with other Designers and third-party partners across campus to help improve high-profile information systems through developing user flows to articulate screen flows and system requirements. Conducted various user interviews and metrics analysis to create detailed design guidelines.

UX Research Intern @ **UW Foster Business**

Center for Leadership and Strategic Thinking at UW FSB

Mar 2022 - Now • Seattle, Washington

Conduct literature reviews, quantitative and qualitative data analysis, and survey support focused on leadership assessment for professionals leaders. Designed dashboards for business intelligence (analytics) products recording leadership assessments and performance impacts accordingly for companies.

● Education
