

Ravi Surana

Senior Product Designer

Senior Product Designer with 9+ years of experience building data-rich **B2B** and **B2C** products across FinTech, FoodTech, HRTech, Legal and more. With an **engineering** and **entrepreneurial** background, I translate complex systems into intuitive experiences through research and data, and **build scalable design systems**. I work closely with engineering, move fluidly from **strategy** to pixel-perfect execution, and increasingly **leveraging AI** to optimize design workflows and deliver measurable business impact. Great design to me is solving the right problems with elegant solutions that create real value.

Work Experience

Senior Product Designer, Strike, Berlin, Germany

June 2025 – Present

- Designing **AI-powered** investment platform (Android/iOS) enabling traders and investors to create custom insights tailored to their strategies, targeting a launch by March 2026 with a goal of **25% conversion rate**.
- Conducted **in-depth user research** to map trader and investor journeys for web platform, identified friction points that led to increase in **trial conversion from 3.5% to 6%** in 2025.
- Leading a team of **3 designers** and managing **cross-functional stakeholders**, providing **mentorship** and strategic direction while setting **OKRs** that align design outcomes with business goals of **\$5M ARR** by 2026.

Senior Product Designer, Paystand, Hyderabad, India

January 2021 - March 2025

- Led UX for ERP-integrated **e-invoice management** platforms for both Account Receivables and Payables, and a flagship **Checkout System** handling over **\$1B+ in transactions** annually, enabling seamless real-time data synchronization across NetSuite, Sage, and MS Dynamics.
- Designed the DeFi Business **Expense Card**, a first-of-its-kind **Bitcoin rewards system**, covering card management, spend controls, KYC/KYB, virtual card creation, and reward system. Launched with 5 enterprise clients, processing **\$1M+ in monthly transactions**.
- Created and maintained a **design system** of UI assets and component library (tokens, patterns, accessibility states), reducing design–dev handoff time by ~50% and UI defects by ~80%.

Senior Product Designer, Leoforce, Hyderabad, India

July 2018 - December 2020

- Designed workflows for Arya, an **AI-powered recruitment platform**, partnering with data scientists to prototype and validate ML-based candidate matching, and recommendations—**reducing sourcing time by 60%** while maintaining high match quality.
- Led research and design for **bias-mitigation models** and **GDPR-compliant** workflows to ensure ethical AI usage across U.S. and EU client touchpoints.
- Created an internal **employee performance management platform** enabling peer-to-peer feedback, task visibility, and self-improvement, increasing employee **happiness scores by ~35%** within the first year.

UX Designer, Ananth Technologies, Hyderabad, India

June 2016 - June 2018

- Led product design for Resqyou, a Missouri-based **legal-tech app** for amending tickets, translating **legal workflows** into intuitive user experiences that drove **early adoption of 5,000 users** and **2,000 tickets** processed in the first months.
- Collaborated with an external agency to **design marketing collaterals** and support the successful launch of the Resqyou app across platforms.
- Designed Splitnsave, a **buy-sell discount marketplace**, leveraging user research and behavioral data to optimize the user journey, increasing **downloads by 50%**, and **conversion rates by 25%**.

Cofounder, Pocketchef, Hyderabad, India

June 2015 – May 2016

- **Built the company** from scratch, hired developers and marketers, led operations across restaurant selection, meal curation, and delivery route optimization to cut ETAs, and **scaled to 10,000+ monthly users**.
- Designed a two-sided marketplace connecting home chefs with customers, creating trust-building features (reviews, ratings, chef profiles), and optimizing both supply (chef onboarding) and demand (customer discovery) sides of the platform.

Software Engineer, Blue Yonder, Hyderabad, India

July 2013 - May 2015

- Designed enterprise software for the Demand Forecasting cloud infrastructure using **jQuery, HTML, and CSS**. This **hands-on development work** and **agile environment** helped me speak engineers' language and design feasible solutions faster later in my career.

Skills

Leadership & Strategy & Industry

Design Strategy, Collaboration, Mentoring, User-Centric Culture, Product Management, Business Requirements, Agile Methodologies, Data-Driven Design, Lean UX, Stakeholder Management, Storytelling | B2B SaaS, Finance, Recruitment, Sustainability, Supply Chain, Food Tech, Ecommerce

Product & Research

Human-AI Collaboration, AI Experience Design, Service Design, User Research Leadership, Usability Testing, Design Thinking, Scalable Design Systems, Information Architecture (IA), User Journey, Wireframing, Prototyping, Responsive Design, Data Visualization, A/B Testing, WCAG 2.2 AA, Material Design, Human Interface Guidelines (iOS), UX Writing

Design and AI Tool | Languages

Figma, Adobe Suite, Miro, Maze, Jira, Confluence, Google Analytics, Metabase, Hotjar | Figma Make and MCP, ChatGPT, Claude, ElevenLabs, Cursor, n8n, Bolt, Lovable.ai | JavaScript, jQuery, HTML, CSS, Webflow

Education

Bachelor's and Master's in Agricultural and Food Engineering, Indian Institute of Technology (IIT), Kharagpur | 2013

Awards

- Best Engineer Award (2x) at Blue Yonder for outstanding performance in a quarter
- Gold Medals (2x) in University (IIT KGP) for creative design leadership in Rangoli & Illumination competitions
- Magazine Writer for Technology Literary Society, IIT KGP
