

SST Company Description

Smart Steel Technologies GmbH

Company description:

Smart Steel Technologies (SST) is a Berlin based company and leading provider of advanced production planning software for the steel industry. SST supports the entire planning process, from strategic supply chain to short-term scheduling, maximizing productivity and integrating business operations seamlessly.

Additional SST solutions cover quality and temperature control, logistics, yard optimization, and surface quality inspection.

Founded by AI experts, mathematicians, and steel professionals, SST's software utilizes mathematical optimization, machine learning, AI, and steel industry expertise. With over a decade of experience, SST enhances efficiency for steel manufacturers.

SST's software enables real-time scheduling, improving supply chain planning and ensuring high-quality, on-time delivery at the lowest cost. By leveraging AI and mathematical optimization and steel production expertise, SST creates flexible production schedules in real-time, that improve operational stability and energy efficiency. The solutions support order fulfillment, inventory management, scenario planning, and KPI tracking, improving decision-making and operational performance.
