

# Advance Upset Prevention & Recovery Course (AUPRT)

## About the Course

The AUPRT Course comprises of;

- 5 hours of theoretical knowledge instruction (delivered online)
- 3 hours of dual flight instruction

Today's commercial aviation industry seeks flight crew who have completed Advanced Upset Prevention & Recovery Training to equip them with the required competencies to both prevent and recover from any unintentional situation in which an aeroplane exceeds the operational parameters. The NFC IAA and EASA certified Advanced UPRT course delivers these competencies in accordance with FCL.745.A. Training takes place on one of our 2 Cessna 152 Aerobat aircraft with our highly experienced AUPRT Flight Instructors.

The aim of the course is to understand how to cope with the physiological and psychological aspects of dynamic upsets in aeroplanes. To develop the necessary competence and resilience to be able to apply appropriate recovery techniques during upsets.

Essential for:

- Training courses for single-pilot class or type ratings operated in multi-pilot operations
- Training courses for single-pilot high performance complex aeroplanes
- Training courses for multi-pilot aeroplanes

## Pre-Requisites

To begin the AUPRT training there are a number of pre-requisites;

- Hold a PPL, or a CPL or a ATPL Licence
- Hold a valid & current Medical Class 1 or Class 2 (for PPL only)
- Minimum ICAO level 4 English
