

Military Families and

Online Crime

1 in 4

Americans will be the victim of an online crime.¹

But, **40%** of military families have already experienced online crime.

And, **27%** believe the online crime was related to their service.

2021

2022

2023

62% of military families

who have moved in the past three years say they/their military family member have experienced online crime.

Only 30% of military families

know that they are at a higher risk of online crime

This survey was conducted online within the United States by The Harris Poll on behalf of Aura from September 19 - 21, 2023 among 2,067 U.S. adults ages 18 and older. The sampling precision of Harris online polls is measured by using a Bayesian credible interval. For this study, the sample data is accurate to within + / - 2.7 percentage points using a 95% confidence level. For complete survey methodology, including weighting variables and subgroup sample sizes, please contact media@aura.com.
