

Grow with Zearn Data

Educators Grades K-5, 6-8

Session Objectives

In this session, participants will:

-  understand the purpose of and apply Zearn’s weekly and daily data routines to keep students on track for 3 grade-level lessons each week
-  interpret their class data to identify and plan whole class celebrations and adjustments
-  examine their student-level data during Zearn time to identify and plan support for individual students
-  learn why and how to adjust students’ Zearn assignments to complement your curriculum

NOTE: This 90-minute session is intended for educators who have engaged in “Launch Zearn Math”. Participants will use their own implementation data during this session.

Session Overview

Grow with Zearn Data (90 minutes)

During this session, participants will:

- deepen understanding of what strong implementation looks like in a given week and during Zearn time
- learn questions to ask within their data to determine if students are on track to complete 3 lessons
- plan strong actions that follow data review, using their own data
- learn why and how Zearn complements their curriculum
- identify where their curriculum maps to Zearn to ensure students’ Zearn placement complements live instruction
