

Foster Independent Learning

Educators Grades K-5, 6-8

Session Objectives

In this session, participants will study:

-  the classroom strategies and habits that cultivate self-directed learners and perseverance with Zearn
-  how to monitor and support students' independent learning with Digital Lessons
-  strategies educators can use to support students if learning becomes unproductive

NOTE: This 90-minute session is intended for educators familiar with Zearn who are interested in increasing students' weekly lesson completion.

Session Overview

Foster Independent Learning (90 minutes)

During this session, participants will:

- identify independent learning habits students can leverage in each component of a Digital Lesson
- explore a case study to learn how teachers might introduce and develop independent learning habits among students
- make a plan to introduce one learning habit to students that will foster independence with Digital Lessons
