WE ARE LOOKING FOR SMART MINDS!

IT SYSTEM ENGINEER - SMART HOME SOLUTIONS

Are you passionate about smart home technologies and eager to shape the future of intelligent living? We are a young, dynamic team based in Adliswil, looking for a motivated **IT System Engineer (100%)** who wants to dive into the exciting world of Smart Home solutions.

Your role

As an IT System Engineer, you will be involved in the development and configuration of comprehensive smart home systems. From planning and implementing customer-specific projects to optimizing network infrastructure and integrating new technologies – your work will have a direct impact on how our clients live and interact with their homes and buildings.

What you'll do
- Design and implement smart home solutions tailored to customer needs
- Configure and manage smart home components (TCP/IP based hardware, modbus connections, Linux-based systems)
- Work on innovative projects from idea to deployment
- Collaborate with a passionate team to continuously improve our systems
- Experiment, prototype, and bring in your own ideas
- Provide remote and on site support for our customers

What you bring
- At least 3 years of experience in IT, ideally in system engineering or a similar technical role
- Solid knowledge in TCP/IP Network, Linux systems and programming skills
- A strong interest in new smart home technologies
- Curiosity, initiative, and joy in creating new solutions
- Ability to work independently and as part of a motivated team
- Enjoy contact with customers for support
- Fluent in German and English

What we offer

Flexible working hours   **Competitive salary**   **Modern smart office**   **Space for personal development**

Are you interested in revolutionizing how people experience their homes?
