

This is an Appendix to the NGPod System Instructions for use (IFU). Please refer to the full IFU before operating the device.

Prior to use of the NGPOD system, compatibility with the nasogastric tube(s) (NGT) to be used should be established.

The table below lists NGPOD sensor code to be used with NGTs that NGPOD has been validated with.

If the nasogastric tube you wish to use is not included in the below list, please contact NGPOD Global www.ngpodglobal.com, info@ngpodglobal.com for advice or to arrange a validation.
