CUSTOM CHICKEN COOPS

Rediscover the pleasures of backyard chicken care.

During the past 50 years, chicken production followed the exodus from small family farms to factory farms. In this industrial model, hens were packed tightly together in small cages to simplify feeding, watering and egg collection. Egg production increased dramatically, while the hens' lives became intolerable. A growing desire to live in tune with nature, and to raise safe and healthy food or eggs from humanely treated animals, has sparked renewed interest in raising chickens in a natural setting.

Imagine waking up in the morning to your rooster crowing, and your chickens clucking. Picture yourself going out in the fresh air to gather healthy eggs for your family's breakfast. You can make this a reality in your back yard with one of our handcrafted chicken coops. Start with one hen, or a whole flock! We can customize anything to fit your dreams, and you can enjoy your own chickens for a lifetime.

Chicken Facts

- The laying period for a chicken is 3 to 4 years
- A chicken will lay one egg every other day during winter months
- A chicken will lay one egg almost every day in spring, summer and fall months
- When chickens sleep (or roost), they line up fairly tightly next to one another
- Chickens are really easy keepers
- If you have the proper feed and water containers, you only need to refill once a day
- The best feed for chickens is a mixture of dried crushed corn, sometimes called layer mash
- Chickens like to scratch around in grass and dirt
- A chicken's egg will keep three or four days without refrigeration
- If you have 5 or 6 chickens, they will most likely use only 1 or 2 nesting boxes
