

Safer stores, stronger communities

Auror connects retailers and law enforcement with the intelligence to reduce crime and harm.

Capability	Auror Lite	Auror
Primary use	Sharing BOLOs across ORCAs	Full retail crime intelligence platform for AP teams
Linking repeat offenders	Manual only	AI-powered — surfaces cross-org suggestions automatically
Visibility	Limited — only shared events	All events, offenders, and vehicles within your organization
Investigations	Cannot initiate, must be invited by a retailer in the Auror network	Create, manage, and receive AI-suggested investigations and cross-org collaboration opportunities
Advanced insights	Not available	Dashboards: top sites, repeat offenders, trends, reporting time, team reporting management
License Plate Recognition	Not available	Real-time alerts when repeat vehicles arrive on-site
Subject Recognition	Not available	Real-time alerts when repeat offenders arrive on-site
Audit	Not available	Easily build audits to inform decisions around store performance and safety

See the full picture, not just a snapshot

Auror Lite shows a moment in time. Auror adds case management, turning it into retail crime intelligence that uncovers repeat offenders and patterns of harm.

Stop manually linking cases

Auror Lite leaves the dots unconnected, but Auror connects them. Focus on repeat offenders and prevent retail crime before it happens.

A command center for collaboration

Auror Lite only shows alerts. Auror manages reporting, evidence, and active cases - collaborating directly with law enforcement to close cases faster and stop crime network-wide.
