

NextGen Synergy

Bold Collaboration. Smart Solutions. Real Impact.

Supporting people with IDD and co-occurring mental health conditions through innovation, equity, and capacity-building.

WHO WE ARE

NextGen Synergy is a nonprofit platform working *like* a community care hub—bringing together providers, people with lived experience, families, clinicians, and policymakers to co-create lasting solutions for people with intellectual and developmental disabilities (IDD) and co-occurring mental health conditions.

We connect the dots between people, systems, and solutions.

OUR MISSION

To expand knowledge, skill, and clinical capacity to ensure people with IDD and co-occurring mental health conditions can thrive in their communities.

HOW WE WORK

- **We Convene.** We create space for cross-sector collaboration through peer learning, case consultation, and live problem-solving.
- **We Build Capacity.** We deliver targeted training, workforce support, and toolkits that promote implementation.
- **We Advance Innovation.** We scale person-centered technology like telebehavioral health, remote supports, and AI-driven solutions.
- **We Partner.** With government, community leaders, providers, and families to align efforts, reduce duplication, and create momentum for meaningful change.

WHAT IS A SYNERGY PASS HOLDER?

- People with lived experience and family
- Provider agencies
- Government leaders and public sector innovators
- Corporate partners looking to collaborate for impact

All Synergy Pass Holders gain access to:

- Free registration for all live and virtual trainings (CEUs where applicable)
- Participation in collaborative case discussions and case consults
- Cross-role discussion forums to share challenges and solutions
- A curated resource hub of tools, policies, and real-time updates
- Pilot and co-design opportunities to test scalable models

WHY IT MATTERS

Like community care hubs in traditional healthcare, our model:

- Helps reduce fragmentation between systems
- Expands access to community-based, cost-effective care
- Strengthens readiness at every level of support

We work with communities to build what works: local voice, smart tools, and connected systems that keep people supported in the places they call home.

OUR ECHO PARTNERSHIP

As official partners in the **ECHO Model®** through the University of New Mexico, NextGen Synergy uses this evidence-based model to:

- Build workforce confidence
- Share real-time case consultation
- Promote democratized learning across providers, teams, and roles

This model creates a “hub-and-spoke” learning structure where everyone *teaches and everyone learns*.
