ISO/IEC 27001:2013

ISO/IEC 27001:2013 is the withdrawn second edition of the ISMS requirements standard, superseded by ISO/IEC 27001:2022; its transition period ended on October 31, 2025.

What it is

ISO/IEC 27001:2013 is the second edition of the international standard that specifies requirements for an information security management system (ISMS), and it is superseded by ISO/IEC 27001:2022, the third edition published on October 25, 2022. Use the ISO/IEC 27001:2022 page for the current requirements; this page describes the 2013 edition for organizations that still work with 2013-based documents, contracts or certificates.

ISO and IEC published the 2013 edition on October 1, 2013, prepared by ISO/IEC JTC 1/SC 27, and it replaced the 2005 first edition. Two technical corrigenda (2014 and 2015) were later incorporated into the 2022 edition. The International Accreditation Forum set a 36-month transition: certification bodies had to complete transitions of certified clients by October 31, 2025, and all certifications based on the 2013 edition were to expire or be withdrawn at the end of that period (IAF MD 26:2023).

Why it matters

- **Know what a 2013 reference means** The 2013 edition ends with Annex A, which lists reference control objectives and controls; the 2022 edition replaced it with a list of information security controls drawn from ISO/IEC 27002:2022.
- **Compare the two numbering schemes** The 2022 edition adds Clause 6.3 and Clause 4.2 c), swaps the order of the two subclauses in Clause 10 and renames and reorders subclauses in Clauses 9.2 and 9.3 (IAF MD 26:2023, section 2.2).
- **Understand the transition** The transition period ended on October 31, 2025, so 2013-based certifications were to have expired or been withdrawn by then.
- **Reuse the existing ISMS** IAF states that the impact of the 2022 edition on organizations that already run an ISMS need not be significant (IAF MD 26:2023, section 2.3).

How SmartSuite supports ISO 27001

Statement of Applicability Carry-over

Keep the 2013 Statement of Applicability (Clause 6.1.3 d) with each control's justification next to the 2022 version so every decision is traceable.

Risk Register and Treatment Plans

Use Cyber & IT Risk to record risks, owners, treatment plans and the risk owners' acceptance of residual risk (Clauses 6.1.2 and 6.1.3).

Policies and Documented Information

Use Compliance Management to centralize the information security policy, controls, testing and evidence required by Clauses 5.2 and 7.5.

Internal Audit

Use Internal Audit Management to plan, run and report on ISMS audits (Clause 9.2) and track remediation.

Nonconformity and Corrective Action

Track nonconformities, corrective actions and verification to closure with owners and dates (Clause 10.1).

Management Review and Reporting

Record management review inputs and results (Clause 9.3) and report ISMS status to top management.

Frequently asked questions

Is ISO/IEC 27001:2013 still valid?

No. ISO/IEC 27001:2022 replaced it on October 25, 2022. Under IAF MD 26:2023 certification bodies had until October 31, 2025 to complete transitions of certified clients, and all certifications based on the 2013 edition were to expire or be withdrawn at the end of that period.

What changed between the 2013 and 2022 editions?

Annex A now references the controls in ISO/IEC 27002:2022, Clause 6.1.3 c) and d) were revised, Clause 4.2 gained item c), Clause 6.3 on planning of changes was added, "outsourced processes" in Clause 8.1 became "externally provided processes, products or services", and the subclauses of Clauses 9.2, 9.3 and 10 were renamed or reordered (IAF MD 26:2023, section 2.2).

How many Annex A controls did the 2013 edition have?

The 2013 control set had 114 controls in 14 clauses, listed with control objectives. ISO/IEC 27001:2022 Annex A references 93 controls in four clauses, of which 11 are new, 24 are merged and 58 are updated (IAF MD 26:2023, section 2.2).

Updated Oct 15, 2026 · © 2026 SmartSuite Inc. All rights reserved.

What did the Statement of Applicability contain in 2013?

Clause 6.1.3 d) required the necessary controls, the justification for including them, whether they are implemented, and the justification for excluding any Annex A control. The 2022 edition keeps the same content in a reorganized wording.

How does an organization move from the 2013 to the 2022 edition?

It compares the controls it has determined with the 2022 Annex A (Clause 6.1.3 c) and updates the Statement of Applicability. If a necessary control was omitted, it must update its risk treatment plans and implement the control (IAF MD 26:2023, section 2.3).
