

Refraction Accessories

Trial Frame 10

The Trial Frame 10 accommodates up to 10 trial lenses with a diameter of 38 mm. Thanks to its numerous adjustment options and a second, smaller nose bridge, the Trial Frame 10 can be adjusted to every face shape.

Trial Lens Set 266

The Trial Lens Set 266 comes in a carrying case with a wooden tray and 268 trial lenses. The lenses feature 38 mm plastic rims and are compatible with the TOMEY Trial Frame 10. To complete the set, two cross-cylinders and a microfiber cloth are included.

Perimeter Lens Set 68

The Perimeter Lens Set 68 helps determine the field of vision, even in people with ametropia. The 68 lenses fit into the lens holders in all TOMEY perimeters. Thanks to their thin metal frames, the size of the visual field during perimeter examination is barely affected. A microfiber cloth is included.
