# LENY®

*The Future of  
Lens Analysis*

# Fast. Simple. Convincing.

LENY® combines precision, speed, and ease of use in one compact system. The lens analyser uses the innovative **transmission deflectometry** principle for a fast, contact-free, and reliable analysis of eyeglass lenses.

- + Binocular lens analysis in less than 10 seconds**
- + Fully automated and easy to use** – ideal for practices, clinics, and optical shops
- + Contact-free and gentle** – no strain on the glasses
- + Visualisation of refractive power and prism** across the entire lens – matching the customer's glasses 1:1
- + Linear colour scales** for easy-to-interpret power maps
- + Ideal for sales support** – clearly demonstrates differences in lens quality
- + For users with high standards** – delivers maximum detail with minimal effort
- + Developed and manufactured in Germany**
