Reduce regulatory risk and costs

– with one scalable UDI solution

GS1 UDI Link helps the business meet global regulatory requirements efficiently and with a future-ready approach. The solution cuts internal costs, reduces regulatory risk, and lessens reliance on manual processes.

What benefits do you gain with GS1 UDI Link?

1. Lower regulatory risk

Standardised data flows and high data quality reduce the risk of non-compliance, penalties and market access issues.

2. Strategic data security and future-proofing

Built on global GS1 standards and ready for new registers and requirements – with no need to rethink your IT architecture.

3. Cost reduction and scalability

Automated reporting reduces the need for manual processes, consultancy support and repeated corrections – and scales easily with product growth and new markets.

4. Faster time-to-market

Streamlined UDI reporting removes bottlenecks in regulatory approvals and supports faster launches.

In short

GS1 UDI Link is a strategic investment that safeguards the company's market access, cuts compliance costs and supports long-term growth.
