jQuery, PHP, C, C++

EXPERIENCE

FiscalNote

Sept 2018 — Present

Lead Product Designer

- Owning design strategy for AI-powered, data-intensive products, leading end-to-end experiences from discovery through delivery across multiple initiatives.
- Designing intelligent workflows enabling users to interpret, validate, and act on complex policy and regulatory data.
- Synthesizing qualitative and quantitative research into insights that directly inform product strategy, roadmap, and design.
- Architecting scalable information systems that structure large, complex datasets into clear, navigable, and actionable experiences.
- Driving the integration of AI-powered features, including search, summarization, and contextual insights to accelerate user workflows and improve efficiency.
- Leading and evolving design systems to ensure consistency, scalability, and faster iteration.
- Prototyping and experimenting with emerging AI tools and approaches to validate concepts and accelerate product development, including contributing lightweight code and submitting PRs to unblock teams and speed up delivery.

10Pearls

Apr 2015 — Sept 2018

UI/UX Designer

Led discovery sessions to define user problems, translating insights into solution concepts that evolved from prototypes into fully launched products.

Clients: USPS, Discovery, EA Sports, Accenture, Avizia & Livesafe.

Dynamic Advertising Solutions

Oct 2014 — Apr 2015

Graphic & Web Designer

Worked with clients to create marketing material & websites.

Clients: Heineken, Adidas, NCAA, Black & Decker, 6ABC News, Washington Capitals & Lululemon.

Telnet Incorporated

Feb 2011 — Feb 2013

Part Time RF & Quality Control Engineer

Modeled systems and created simulations to evaluate radiofrequency field levels of cell sites for carriers like AT&T, Verizon and Sprint.
