OsecoElfab's MV-RF explosion vent is an all metal design using a stainless steel controlling membrane (no fluoropolymer).

No holes or slits are visible, which makes the MV-RF vent excellent for applications, such as bag houses or bulk storage units, where product build-up may be a concern.

The vent may be exposed to system pressures up to 60% of the stamped burst pressure.

The MV-RF is also available with FDA-approved gaskets for use in sanitary service applications.
