SKU	GRC - ESG - ESG
Solution area	GRC & Resilience
Works with	Enterprise Risk Management (ERM), Third Party Risk, Policy Management, Compliance Assessments & Testing, Issues Management, Operational Resilience
Updated	Sep 26, 2026
Datasheet	v1.0

What it is

ESG & Sustainability Management is the process of tracking environmental, social, and governance performance and reporting on sustainability initiatives. It enables organizations to align with regulatory frameworks, monitor progress, and improve transparency across ESG programs.

ESG & Sustainability Management is the process of tracking environmental, social, and governance performance, aligning with regulatory requirements, and reporting on sustainability initiatives. SmartSuite's ESG & Sustainability Management software provides a structured, scalable system to manage ESG programs across your organization — ensuring transparency, accountability, and compliance.

SmartSuite enables organizations to collect, validate, and manage ESG metrics across departments, business units, and geographies. With a centralized system of record, teams can manage disclosures, track performance, and document sustainability initiatives in a way that is repeatable, auditable, and defensible.

ESG & Sustainability Management in SmartSuite.

Core capabilities

ESG Data Collection & Validation

Collect, validate, and manage ESG metrics across departments and systems with structured workflows.

Framework Alignment & Reporting

Align ESG reporting with CSRD, SEC, SASB, GRI, and other global frameworks.

Sustainability Performance Tracking

Track ESG goals, KPIs, and performance trends across the organization.

Disclosure Management

Manage ESG disclosures and reporting workflows with structured review and approval processes.

Supply Chain ESG Oversight

Monitor vendor and third-party sustainability performance and compliance.

Dashboards & ESG Analytics

Visualize ESG performance, trends, and gaps through real-time dashboards.

Workflow Automation

Automate data collection cycles, approvals, and reporting workflows using no-code automation.

Cross-Product Integration

Link ESG data to risks, vendors, policies, and operational workflows.

Role-Based Access Control

Ensure secure access to ESG data and workflows across teams and stakeholders.

The ESG Lifecycle

Step 1 Define ESG Metrics & Scope Establish ESG KPIs, frameworks, and reporting requirements.	Step 2 Collect & Validate Data Gather ESG data across business units and validate accuracy.	Step 3 Analyze Performance Evaluate trends, identify gaps, and assess performance against targets.	Step 4 Report & Disclose Prepare and publish ESG disclosures aligned with regulatory frameworks.	Step 5 Improve & Optimize Track progress and implement initiatives to improve ESG performance.

Who it is for

Chief Sustainability Officer (CSO) Leads ESG strategy, reporting, and performance tracking across the organization.	Compliance Manager Ensures alignment with ESG regulations and reporting requirements.	Risk Manager Integrates ESG risks into enterprise risk management and mitigation strategies.
Operations Leader Tracks operational ESG performance across facilities and processes.	Procurement / Supply Chain Leader Monitors vendor sustainability performance and ESG compliance.	Executive / Board Member Monitors ESG performance, risks, and disclosures through dashboards.

Works with

Enterprise Risk Management (ERM) ESG risks are incorporated into enterprise risk assessments and reporting.	Third Party Risk Vendor ESG performance and sustainability risks are monitored and assessed.
Policy Management ESG policies and governance standards guide sustainability practices.	Compliance Assessments & Testing ESG controls and reporting processes are validated through compliance activities.
Issues Management ESG-related gaps and performance issues are tracked and remediated.	Operational Resilience ESG risks related to climate and operational disruptions inform resilience planning.

Built differently. ESG & Sustainability Management runs on the same relational platform as every other SmartSuite product, so its records link to the risks, controls, issues and evidence they affect, and every report reflects the current state rather than a copy.
