GENERAL INFORMATION

Es Racó Experiences

Our experiences connect you with nature and local culture. From artistic, gastronomic, wine or cultural routes. Ask for information at reception.

Es Racó Sustainability

One of our goals is to respect the environment that surrounds us, nature prevails above all. That is why we are committed to using the most harmless products for you and for the environment, from the line of cosmetic products in the rooms to the brands used in the Spa, our ecological and Km 0 gastronomic concept, and the drinks we offer such as the water you drink, but also, when building this magical place, we thought about those details. Our water is recycled in a circuit of up to three times its length, we heat the Spa with geothermal energy, something really unusual on this island, and we use traditional construction methods respecting the original structures and always integrating everything into the landscape.

Es Racó Agriculture

The finca extends over 220 hectares of natural landscape. Be prepared to see sheep or donkey as you stroll around our extensive grounds. Or take a look at the most curious chickens you've ever seen. On the cultivated land lies our 14-hectare organic vineyard, which provides us with the grapes for our wine. In addition, there are around 1200 olive trees, 200 different fruit trees, a field of native xexxa, our 2000 m² organic vegetable garden and the aromatic herb garden. We produce our own olive oil and organic xexxa flour. In addition, our bees ensure that you can enjoy fresh honey for breakfast.

FOR YOUR SECURITY

How we sanitise: We use ecological cleaning products perfect for disinfecting and sanitising while respecting our environment. We have the technical data sheets of all of them.

A semi-automatic external defibrillator or AED is available at reception. AEDs are responsible for analysing the heart's rhythm and identifying the patterns to follow in order to deliver an optimal shock.
