

Human Placental Allografts

Human placental tissue is comprised of the amnion and chorion membranes. The avascular membranes act as a protective barrier for the developing fetus and its properties provide a wide variety of potential benefits.

SanoGraft®

Advanced Single Layer Amnion-Derived Allograft

SanoGraft® is a state-of-the-art single layer allograft derived from the amniotic membrane. It serves as a protective barrier, reducing complications and ensuring superior wound care.
