

Human Placental Allografts

Human placental tissue is comprised of the amnion and chorion membranes. The avascular membranes act as a protective barrier for the developing fetus and its properties provide a wide variety of potential benefits.

SurGraft TL[®]

Advanced Triple Layer Amnion-Derived Allograft

SurGraft TL[®] represents a state-of-the-art triple-layer amnion-derived allograft meticulously designed for wound coverage, serving as a protective barrier.

Product Name	Description	Size	Product Code	UPC	Billing Units

HCPCS Level II Code Q4263, "SurGraft TL, per square centimeter"

About Surgenex

Surgenex® is an industry-leading biotechnology company advancing patient care through innovative placental and musculoskeletal allograft solutions. Since 2015, we have been dedicated to developing and delivering safe, high-quality biologic implants that meet the highest standards of performance, quality, and regulatory compliance.

With a growing national footprint and a new 65,000+ sq. ft. state-of-the-art processing facility underway, Surgenex continues to expand its capabilities to meet the evolving needs of clinicians and patients with customized, innovative implants for a wide range of surgical applications.

Driven by a commitment to excellence, our team combines deep industry expertise, a robust quality system, and a dedication to exceptional service, reliable delivery, and meaningful outcomes.

Surgenex®—trusted innovation supporting those who serve.

Excellion® Process Differentiators

No Harsh Chemicals or Antibiotics

Our proprietary Excellion® process focuses on harnessing the natural benefits of the tissue with minimal manipulation.

Fresh Tissue Processing

Tissue is collected promptly and delivered fresh for processing to achieve optimal results.

Meticulous Quality Assurance

Surgenex® takes pride in assuring the highest technical quality and rigorous testing to ensure safety without compromise.
