

Human Bone Allografts

All human bone-derived allografts are meticulously processed under tightly controlled, validated procedures to ensure the bone tissue is effectively cleaned and sterilized while preserving its native biomechanical structure. Our proprietary demineralization process has been validated to induce a positive in vivo osteoinductive response.

SurMatrix® Laminar Bone

Flexible Support for Surgical Excellence

SurMatrix® Laminar Bone allografts feature thin sheets of demineralized cortical bone processed to offer remarkable flexibility without compromising strength. Ideal for procedures necessitating a rigid membrane to uphold space and deliver exceptional performance.
