FEATURES

All tops are 1 1/8" (2.8 cm) thick

SOLID WOOD		Tops are constructed of solid wood glued boards – only the most attractive sections of the timber are processed to the highest quality standards.
Characteristics		Every tree is a unique creation of nature, so that the color, shade, and structure may well differ from one item of furniture to the next. An item of furniture in solid wood reveals the character and history of a mature tree that may have been 50 to 100 years old: small knots, variations in the growth pattern, and fine cracks caused by the wind are natural features of genuine solid wood furniture. The underside of the table differs from the top, since individual planks are positioned with any knots or less desirable grain effects concealed.
Temperature Caution		Solid wood is a living product, so that slight surface irregularities are to be regarded as normal when the climate changes (i.e. when the room is heated or when the summer is cool and wet). The optimal atmospheric humidity, summer and winter, is approximately 55%. Electrical equipment that generates heat, such as computers, lamp transformers, etc., must not be placed directly on a solid wood surface. Their heat dries out the wood excessively at the contact area, and may cause it to split.
Solid Wood Selections		Standard offering is Elm, Oak, Sycamore, and American Walnut. Other species of wood are subject to availability and construction requirements - contact Factory with wood desired - will require additional lead time
Elm	-EE	The heartwood of the elm has a brown to slightly reddish coloring. The growth rings are a prominent visual feature. The sapwood is much paler, and it is this contrast that gives the wood its strong textured effect.
Oak	-OA	Oak's color scale ranges from yellowish-brown to mid-brown. It is a very hard and durable wood.
Sycamore	-SS	The sycamore is steam-treated, which brings out its warm, reddish color. Alternating lighter and darker areas with a calm, strongly linear grain pattern make this wood unique and unmistakable.
Walnut	-WW	American walnut's heartwood is chocolate to violet-brown in color.
Surface Finishes		Tops are standard with a clear lacquer finish – a natural linseed oil finish may be specified at no upcharge
Lacquer		Standard is a clear coat of lacquer that is applied to the raw wood to enhance the natural characteristic of the wood and add a protective coating.
Linseed Oil		Optional Finish - X2-Oiled Finish - A natural linseed oil is applied in several coats on raw wood – SPECIFY AT TIME OF ORDER This finish will have to be reapplied as it dries out on the product - so extended care is necessary Initial order with this finish has a touch-up kit included - for oil replacement purchase locally boiled linseed oil
Legs		Legs are solid wood, the same as the table top. Legs have individual nodules in cast metal, with steel plate connectors, with powder coat finishes in 01-Sand, 02-Silver, 03-Anthraccite or 04-Rust.
Custom		X2 is always built individually to order, so that suitable special dimensions may be chosen for all items. For special projects, please consult the factory in advance – we will gladly provide the necessary support for your space and product planning
Edge Detail		See below for the edge detail. The standard corner edge will be a 5cm radius. 
Access Lid		If electrical is ordered all access lids will come standard in solid wood to match the top.

Solid Wood

ELM Solid Wood

OAK Solid Wood

SYCAMORE Solid Wood

WALNUT Solid Wood

*Standard in Lacquer - **X2-Oiled** finish is an option, no upcharge*
