## FEATURES

---

### **Base**

Frame is crafted from solid oak hardwood. Legs and structural members are precision-milled using advanced 5-axis CNC machining to ensure consistent fit and a seamless transition between components. Joinery is reinforced with steel fasteners for lasting strength and stability.

---

### **Glide**

Black plastic glides are standard.

Optional felt glide - **Ti-Felt** felt glides available upon request – no charge at the time of order

---

### **Seat & Back**

Seat and back are formed from multi-ply bent plywood, shaped under heat and pressure to create smooth, ergonomically contoured surfaces. The plywood seat and backs are veneered with Rift Cut Oak to match the solid Oak wood frame, providing a cohesive appearance. Particular attention is given to the junction between the solid wood frame and the plywood back, where the components are joined using a concealed mechanical connection that ensures a tight, gap-free fit while allowing the sculpted silhouette to flow uninterrupted from frame to backrest. This detail is critical to both the structural performance and the refined aesthetic of the chair. See below for an example of this detail.

### **Stacking**

All veneer and chairs with an upholstered seat can stack 6 high

---

### **Upholstery**

An optional fully upholstered seat is available, featuring a foam-padded plywood substrate that delivers enhanced comfort and a tailored, finished appearance.

All foam components meet the flammability requirements of *California Technical Bulletin 117-2013 (CAL TB 117-2013)*.

Available in approved fabrics and leathers from the Davis Fabric and Leather Program, or in COM/COL. For approved materials, visit [www.davisfurniture.com/fabric-approval](http://www.davisfurniture.com/fabric-approval).
