FEATURES

Base

Each table is built from three principal components: a spun steel lower cone, and upper cone, connected with a steel column. All components are mechanically fastened through a concealed hardware set. This three-piece assembly allows for complete field disassembly, enabling inplace replacement of individual components should damage occur in service. A concealed ballast is integrated within the lower cone to lower the center of gravity and resist tipping under lateral load, eliminating the need for floor anchoring.

Glides

Standard with felt glides.

Tops

The top is fabricated from 3/4" (19 mm) medium-density fiberboard. Surfaces include:
Wood Veneer - Wood Veneer: Ash, Oak, or Walnut
FENIX® - Fenix with matching ABS Edgeband
Standard Laminate:
Solid Color laminates - all have matching ABS edge bands.
Wood Grain laminates - *Natural Ash, Nut Brown Cherry, Finnish Oak, and Formal Walnut* have matching ABS edge bands. All other wood grain laminates will be a self edge
