FEATURES

Base

K90 is a flip-top, nesting training table. The base consists of two solid steel leg assemblies joined by a central structural member, with decorative wood veneer panels integrated into each leg assembly.

Each leg assembly is fabricated from solid steel, formed into a splayed configuration that provides a stable footprint and a visually light profile. The steel components are available in all Davis standard powder coat finishes, see page 7.

Casters

All training tables come standard with two black locking and two non-locking universal casters. Universal casters are designed to work on all floor types.

Decorative Panel & Vertical Wire Management - see page 3 for additional information

A decorative panel is fitted to the outside of each leg assembly, serving as visual element of the base. The magnetic panel on the inside of the leg serves as a wire manager cover.

Vertical Wire Management is standard on all tables. The decorative panel and wire management panel can be specified in coordinating materials.

The following list represents the available materials:

- **Wood Veneer:** Ash, Oak, or Walnut
- **Fenix® Laminate**
- **Davis Standard Laminate**
- **Steel** - Davis Standard Powder Coat Finishes

Horizontal Wire Management

Horizontal wire management is provided by a steel trough that spans between the two leg assemblies. The trough is powder coated to match the base finish.

Release Mechanism

The base supports a flip-and-nest top mechanism, allowing the worksurface to rotate to a vertical position so that multiple tables may be nested together for storage or reconfiguration. Two handles, one on each side, release the top from its horizontal position. Torsion springs assist the motion and control the rate of rotation from horizontal to vertical.

Modesty Panels

Veneer - $\frac{1}{2}$ " thick MDF core panel with 1mm solid wood edgeband

Laminate - $\frac{1}{2}$ " thick MDF core panel with 1mm ABS edgeband

Tops & Edge Treatments

Training Tables

Veneer Tables - $\frac{3}{4}$ " thick MDF core with 1mm solid wood edgeband

Laminate Tables - $\frac{3}{4}$ " thick MDF core with 1mm ABS edgeband - *must specify*

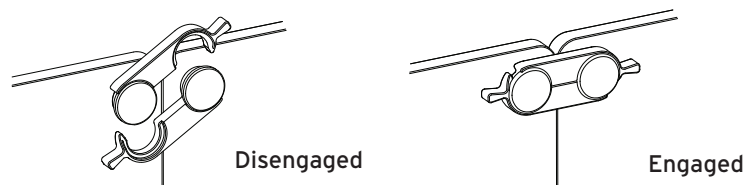

Solid Color laminates - all have matching ABS edge bands.

Wood Grain laminates - **Natural Ash, Nut Brown Cherry, Finnish Oak, and Formal Walnut** have matching ABS edge bands. For all other wood grain laminates a solid color ABS edgeband must be selected.

FENIX® Tables - $\frac{3}{4}$ " thick MDF core with 1mm ABS edge band to match top color

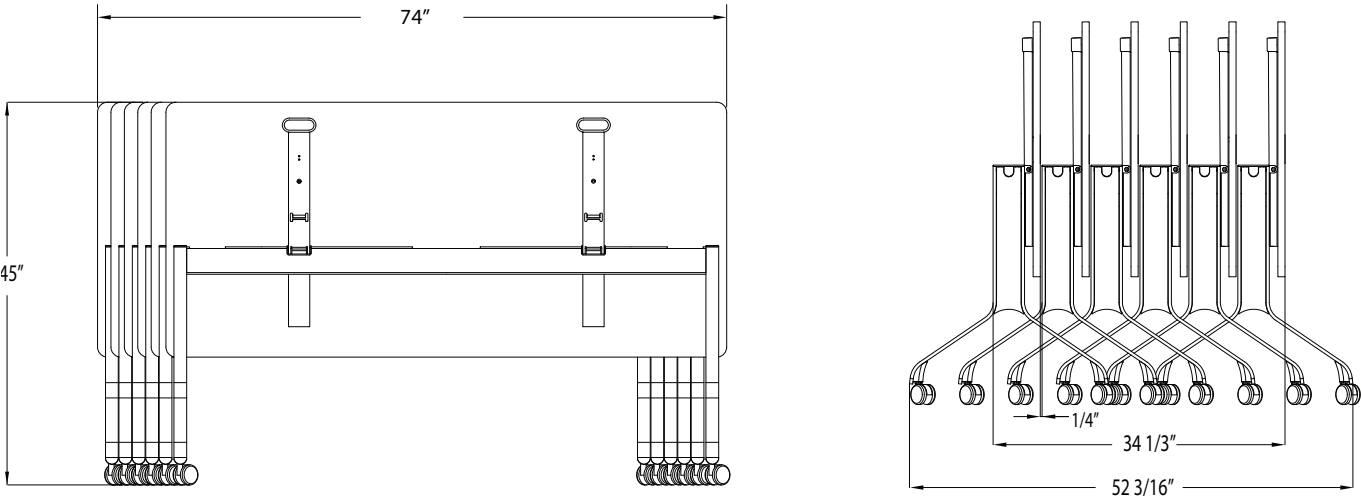

Ganging

Ganging devices are standard on all training tables

Item	Description	List Price
Connector Cord		
	K90-CON Connector Cord	152

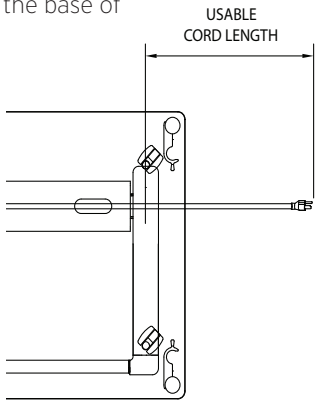

Electrical Overview

- A maximum of 8 Duplex receptacles (16 outlets), allowed per base feed (circuit), which equates to 8 tables each having one Duplex receptacle.
- USB-A+C Charging Units are not considered a receptacle and are not included in the total count of receptacles.
- Corded infeeds are single circuit only. The maximum power draw is 15amps per single circuit.

New York City, San Francisco, and Chicago have specific requirements for the use of manufactured wiring systems. Please contact an electrician for local code requirements.

Usable Cord Lengths

The Usable Cord Length chart shows the length of usable cord from the base of the leg to the plug.

Usable Cord Length			
Table Length	72" Power Cord Infeed	96" Power Cord Infeed	120" Power Cord Infeed
60"	27.25"	51.25"	75.25"
66"	24.25"	48.25"	72.25"
72"	21.25"	45.25"	69.25"

- **Example:** if the table length is 60" and a 72" power infeed starter cord is ordered, the usable cord length from the leg to the outlet is 27.25".
