Ordering Example 20

BIFMA Compliant,® the commercial furniture industry's registry of standards-conforming products.

FEATURES

Platform

Dimension: 3 $\frac{3}{8}$ " thick.

Constructed from a combination of MDF core, engineered with a steel support system to provide a solid, dimensionally stable foundation for the seating above. Available with premium surfacing:

Veneer - Ash, Oak and Walnut

FENIX® - 1.2mm Solid Core material is utilized to ensure backing is not visible at laminate joints

Standard Laminates

Leg

Supported by a sculptural die-cast aluminum leg, engineered and designed exclusively for Faba Lounge. Precision die-cast for dimensional accuracy and structural integrity, the base delivers exceptional stability across single-seat, multi-seat, and sectional configurations. Available in Polished Aluminum or any of Davis' powder coat finishes.

Glides

Black plastic adjustable glides come standard.

Ganging

Platforms can be ganged on ends and front to end.

Seats, Backs & Arms

Upholstered seats, backs, and arms are constructed over engineered plywood frames, selected for their strength and dimensional stability. Each component is layered with multi-density polyurethane foam, carefully calibrated to deliver firm, supportive contact at key load-bearing points and a softer, more cushioned feel at the surface for all-day comfort.

Structural connections between seat, back, and arm components are achieved through heavy-gauge steel connector plates, engineered to provide rigid, gap-free alignment across modular configurations. Plywood cushion substrates are mechanically fastened to the platform using threaded inserts and machine screws, ensuring a secure, serviceable attachment that maintains precise fit and finish over the life of the product.

All foam components meet the flammability requirements of *California Technical Bulletin 117-2013 (CAL TB 117-2013)*.

Upholstery

Double Needle stitching details add a tailored and refined accent that highlights the lounge collections form.

Available in approved fabrics and leathers from the Davis Fabric and Leather Program, or in COM/COL. For approved materials, visit www.davisfurniture.com/fabric-approval.

Power

Power units come in black or white and are designed for platform placement.

Velcro strips are mounted on the underside of the platform for horizontal wire management.
