SOLENNE Lounge Series

Designed by jehs+laub

FEATURES

Frame

Solid hardwood construction, offered in ash, oak, and walnut. The frame is crafted from precision-milled solid wood components, shaped with advanced 5-axis CNC machining for consistent fit and finish.

Joints are reinforced with a combination of hardwood dowels and steel fasteners for lasting strength and stability.

Seat & Back

Rigid Urethane is incorporated into the corners to ensure the form is maintained after years of use.

Seat and back are constructed using precision-molded polyurethane foam, engineered to provide a supportive, contoured shell that complements the natural lines of the frame. Strategically placed voids are incorporated into the seat and back cores, which are then filled with a softer foam. This dual-density approach delivers firm, long-lasting support at key points. The result is a seating experience that balances structural integrity and inviting softness.

All foam components meet the flammability requirements of California Technical Bulletin 117-2013 (CAL TB 117-2013).

Glides

Standard with plastic glides.

Optional felt glides **SO-Felt** - *no upcharge if specified at the time of order.*

Upholstery

Double Needle stitching details add a tailored and refined accent that highlights the chair's sculpture.
Available in approved fabrics and leathers from the Davis Fabric and Leather Program, or in COM/COL.
For approved materials, visit www.davisfurniture.com/fabric-approval.

For information concerning Condition of Sales, Warranty, Fabric, Finishes, etc., please download the *Conditions of Sales.pdf* on the Davis web site: www.davisfurniture.com
