

● 12+ Languages

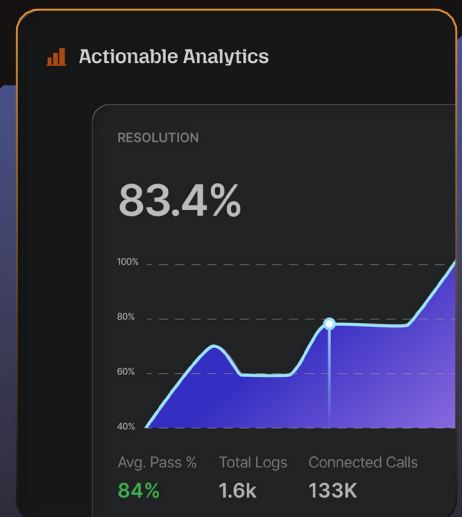

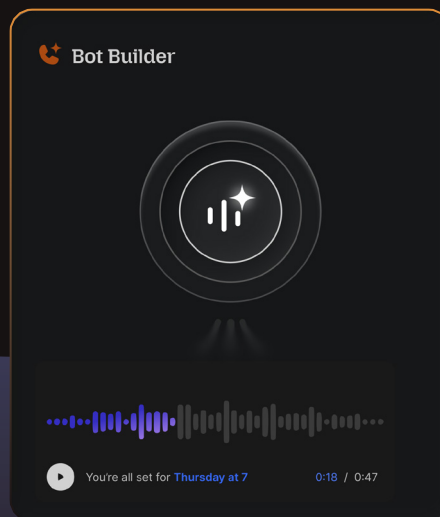

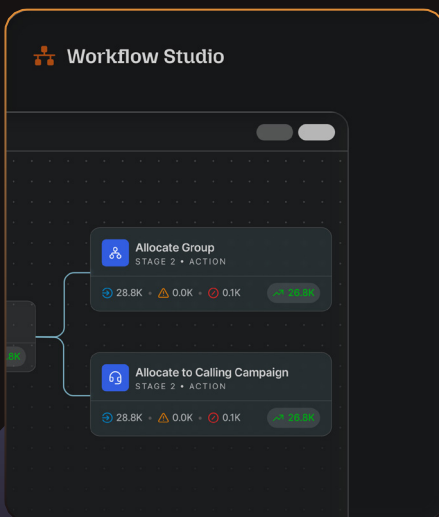

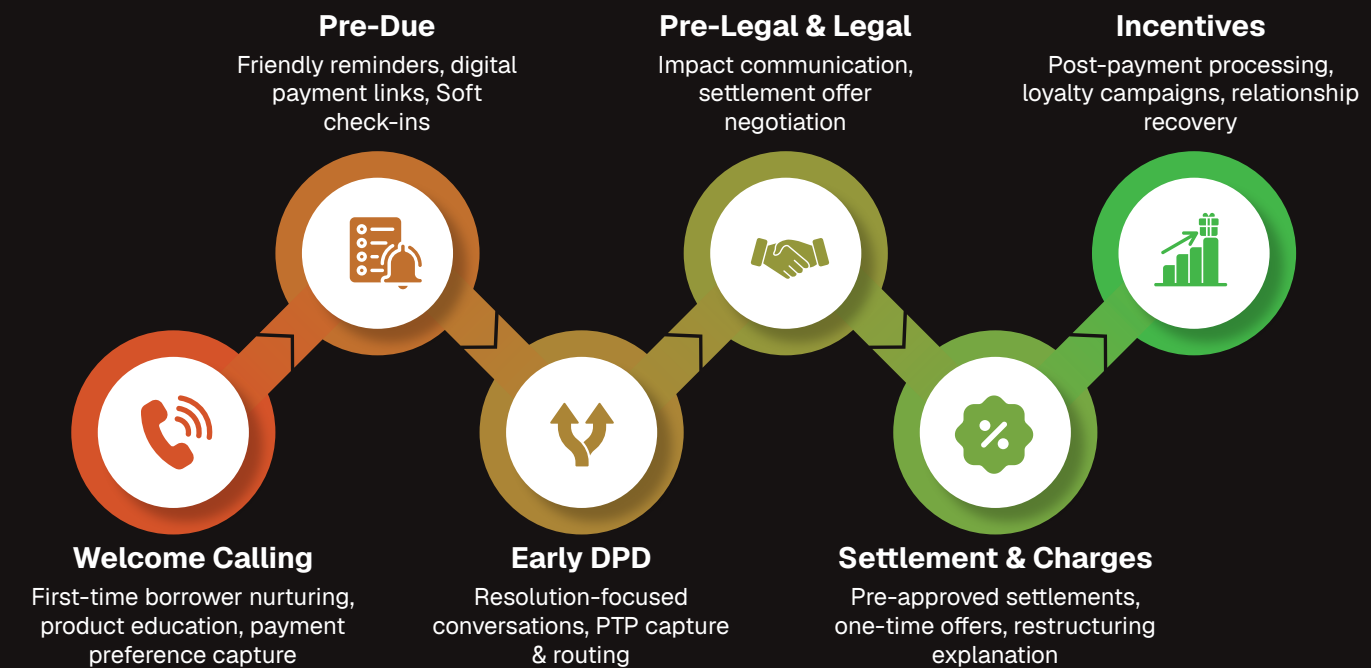

● <800ms Latency

● RBI & DPDP Compliant

Voice AI Platform Built for Outcomes at Enterprise Scale

Deploy voice agents that handle entire customer journeys in **12+ languages**. Integrated with Credgenics' data intelligence, Prix delivers **faster recoveries, reduces costs, and stays compliant** across every interaction.

Purpose-Built Journeys Across the Collections Lifecycle

Focussed on Outcomes, Not Only Call Counts

Our pricing model aligns our success directly with your collection outcomes.

PTPs secured, settlements locked, recoveries driven—that's how we measure success. Not by call duration or sentiment scores.

Every Conversation. Smarter Than The Last.

Closes the Loop, Automatically

Capture rationale, negotiation signals and recovery probability to recommend the next best action, not just log it.

12+ Indian Languages

Engage borrowers in their preferred language with real-time language switch.

Live Handoff, Mid-Conversation

Voice AI + Dialer infrastructure transfers live calls to a human agent instantly — full context carried over, nothing repeated.

Scales the Moment You Need It

Handles demand spikes instantly no hiring, no ramp-up, capacity that flexes with volume, not headcount that lags behind it.

Trained Before Day One

Already learned from real portfolios and conversations — so you're deploying a system that's been tested, not piloting one that's still learning.

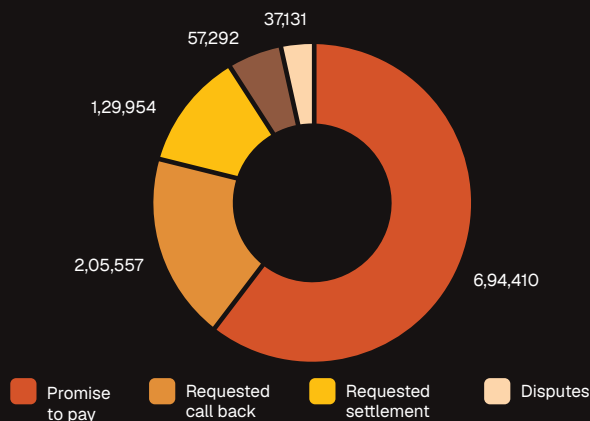

Every Call Audit-Ready

Automated QA scorecards, full transcript indexing, and policy guardrails eliminate compliance blindspots.
