RE: RECOMMENDATION OF IMMUNIFY LIFE AS A TRUSTED DIGITAL HEALTH PARTNER

Refer to the subject matter above.

The Ministry of Health of the Republic of Zambia is pleased to acknowledge the collaboration and contributions of Immunify Life, a digital health technology provider, in advancing the nation's efforts to strengthen healthcare delivery systems.

In 2024, Immunify Life successfully partnered with the Ministry on a malaria prevention and surveillance pilot project in Chongwe district. This initiative focused on digitising the distribution and follow-up of Insecticide-Treated Nets (ITNs) through Antenatal and under five clinics. The program demonstrated the effective use of their highly secure platform to capture real-time health data, even in remote locations with limited internet connectivity. The pilot has yielded promising results by capturing and synchronising patient data, improving data integrity, and Community Health Workers engagement.

The Ministry recognises Immunify Life as a reliable and capable partner, particularly in the areas of:

- Digital health data collection and analytics
- Secure recordkeeping and patient tracking
- Community-based health programme monitoring and evaluation
- Strengthening accountability in the distribution of health resources

We further acknowledge Immunify's alignment with our strategic priorities to reduce malaria prevalence, strengthen immunisation programmes, and digitise public health systems across Zambia.

It is against this background that we recommend Immunify Life to any local, regional, or international stakeholders, including NGOs, multilateral donors, and academic partners, as a trusted and innovative partner in digital health implementation and research.

Dr. George Sinyangwe
Permanent Secretary – Donor Coordination
