The following extracts from section 5 of the AIB 'Transaction costs' contain the changes detailed on page 1 of this Notice relevant to this Fund and replace the paragraph immediately before the table, the table and the paragraph immediately following the table: .

The transaction costs shown in the table below that are applied to each Fund is based on the amount of transaction costs that were charged over 12 months to 30 June 2025.

Our estimate of the total transaction costs for each Fund above was calculated using each Fund's actual transactions during the financial year to 30 June 2025. We expect this amount to vary from year to year as it will be impacted by each Fund's volume of trading, brokerage arrangements and other factors. The amount recovered through the buy-sell spread was calculated using actual applications and redemptions during the last financial year. We expect this amount to vary from year to year as it will be impacted by the volume of applications and withdrawals and any changes in the buy-sell spread for each Fund. The net transaction costs is the difference between these two amounts. All of these amounts are expressed as a percentage of each Fund's average net asset value for the year.
