3. Additional explanation of fees and costs

The following 'Transaction costs' replaces the 'Transaction costs' in section 7 of the PDS and contains the changes detailed on page 1 of this Notice.

Transaction costs

Transaction costs are generally incurred when the assets in the Fund are charged or the Fund experiences cash flow into or out of the Fund and are not included in the management fees and costs.

The transaction costs shown in the 'Fees and other costs' section in this PDS are net of any amount recovered by the buy-sell spread that is charged by the RE.

They include costs such as brokerage, exchange fees, clearing costs and applicable stamp duty. Transaction costs paid out of the assets of the Fund are an additional cost to investors to the extent not recovered through the buy-sell spread.

The transaction costs shown in the table below that are applied to the Fund are based on the amount of transaction costs that were charged over 12 months to 30 June 2026.

Fund	Gross transaction costs before the buy-sell spread cost recovery	Transaction costs shown net of the buy-sell spread cost charged by the Fund
Bell Global Emerging Companies Fund (Class A) Active ETF	0.17%	0.04%

Our estimate of the total transaction costs for the Fund above was calculated using the Fund's actual transactions during the financial year to 30 June 2026. We expect this amount to vary from year to year as it will be impacted by the Fund's volume of trading, brokerage arrangements and other factors. The amount recovered through the buy-sell spread was calculated using actual applications and redemptions during the last financial year. We expect this amount to vary from year to year as it will be impacted by the volume of applications and withdrawals and any changes in the buy-sell spread for the Fund. The net transaction costs is the difference between these two amounts. All of these amounts are expressed as a percentage of the Fund's average net asset value for the year.
