## Benefits of vehicle sharing with MyMove

Optimize the planning and operational sharing of service vehicles for users & management

Completely automate the experience so users can autonomously book & use vehicles

Easily manage the users, their damage and their fines across the shared fleet in a centralized way

Remove the hassle of fleet sharing with a turnkey, all-in-one solution

Optional justification (reason) of usage of service vehicles for professional trips

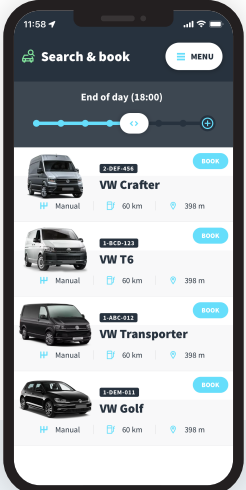

Get real-time metrics per vehicle & insights in status, availability and saturation rate of the shared fleet

# MyMove's features highlights

Keyless vehicle sharing  
via mobile app

Integrated payments  
(in-app)

In-app 24/7 support

Damage checks

Fleet management  
dashboard

ID & Driver's license  
control

**Customer stories**

## Customer Story Highlight **Indaver**

### The challenge

The secretary offices spent a lot of time managing reservations the old-fashioned way (with an online Outlook agenda). Also key-management was recurring pain: keys got lost, employees forgot to bring them back or keys were not available when the car needed to go to maintenance or the car wash. There was so much friction, people hardly used them at all.

### The MyMove Solution

MyMove integrated the Indaver cars in the app and gave the employees access to it. The Indaver fleet is now 100% keyless, shared and managed digitally. The partnership with MyMove brings a high-value and time-saving solution to the secretaries, as well as a leaner way for employees to go about their mobility.
