

The #1 digital rental solution for vehicle rentals.

The screenshot shows a software interface for vehicle bookings. At the top, there are filters for 'Eigentümer' (Owner) set to 'Demo 2', 'Name' set to 'Nico', 'User', 'Vehicle', and 'Cancelled' set to 'Not cancelled'. Below this is a 'Bookings' section with a table for 'Car (8)'. The table shows vehicle details like 'Audi A3 1-03M-001', 'Audi A4 1-03M-334', and 'Audi Q3 1-03M-033'. The main part of the interface is a booking calendar for 'Week 11 (14/03)'. It displays several booking slots for different vehicles, including 'Audi Q3', 'Audi A3', and 'VW ID.3'. Each slot shows the start and end dates, the vehicle model, and the price. A pink button at the bottom of the calendar says 'Explore solution'.

Benefits of digital rental with MyMove

Easily run a multi-channel car rental business by removing the hassle of renting your fleet

Customers can choose their preferred journey by renting a vehicle digitally or via your service desk

Customer stories

Customer Story Highlight **Delrue Rent**

The challenge

The vehicle rental market is rapidly digitizing. Delrue was looking for a partner to implement a scalable, 24/7 vehicle sharing scheme that offers the best customer experience. Security and damage checks were also a top priority as rental companies regularly face misuse of their vehicles by clients.

The MyMove Solution

With MyMove, Delrue now offers a fully digital vehicle sharing ecosystem, thereby effectively creating a multi-channel rental service. The customer rental journey features two extensive damage checks and cars can be tracked in real-time. With MyMove, Delrue can offer the most customer-centric customer experience.
