

The #1 vehicle sharing solution for corporate fleets.

The screenshot shows the MyMove platform's booking interface. It displays a grid of vehicles (Bike, Car, Scooter) with their availability and booking details. A prominent pink button in the center says "Explore platform". To the right, a mobile phone displays the "Search & book" app, showing a list of available vehicles like Segway ES4, VW Caddy, and Audi A4.

Benefits of offering vehicle sharing with MyMove

Reduce your fleet size by operating a shared fleet & cuts costs by increasing the usage of your vehicles

Smaller fleets also imply a lesser need for parking spots at your premises to actually park them

Reduce your CO2 footprint by encouraging light-commuting and 2-wheelers for small distances

Monetize your fleet by renting it out to your employees for their private usage

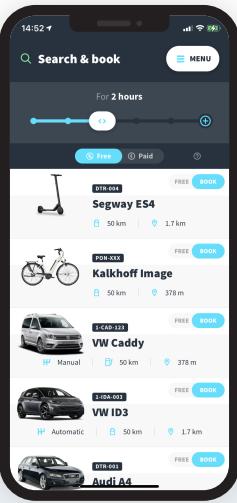

We're an end-to-end solution. That means not logging into 10 platforms to use the shared fleet

Users can finally book, use and return a vehicle (keyless), without any interaction from others

MyMove's features highlights

Keyless vehicle sharing via mobile app

Integrated payments & pro/private differentiation

In-app 24/7 support

Damage checks

Fleet management dashboard

ID & Driver's license control

Customer stories

Customer Story Highlight **Roland Berger**

The challenge

In 2019, Roland Berger started implementing the mobility budget. To offer its employees a viable and flexible mobility solution, Roland Berger needed a partner that could provide an app-based shared fleet that employees can use professionally and privately. That way, they would be offered a viable alternative to the private company car.

The MyMove Solution

With MyMove shared fleet, employees enjoy more flexibility: they can choose the right transport mode for their mobility needs. Mymove also helps Roland Berger to reduce mobility costs: no more taxi or Uber expenses. And as the fleet operations are managed by MyMove, these benefits come without extra burden for Roland Berger.
