IM500

TOUCHLESS™
TRANSFORMER
MONITORING

The IM500 provides visual and thermal transformer monitoring in a compact IoT sensor. The IM500 connects automatically to the SWI Cloud Dashboard to provide transformer health status and trending. Integrated analytics track data and provide alarms for early warning of potential failures. The IM500 Quick Mount allows for a fast, one person installation on live equipment. The Quick Mount supports up to three IM500 SWITCH™ Modules to provide constant thermal and visual monitoring of all critical transformer components.

Contact us to learn more about our IM500 Touchless™ monitoring solution.
