Professional Experience

Corelight — Senior Product Designer

Nov 2023 - Present

Led user research and design for Agentic AI-guided investigation workflows that automate evidence gathering and summarization, reducing triage time by up to 50% and accelerating analyst expertise

Collaborated with data science, engineering, and SMEs to align AI capabilities and prompts with SOC analyst mental models

Defined new interaction patterns that deliver instant detection and entity insights, enabling faster and more confident decisions

Rippling — Product Designer

Feb 2022 - June 2023

Oversaw the design and delivery of multiple new table-stakes features and improvements to existing features for Rippling's Device Management app

Led discovery and design for Rippling's 0→1 app, Automated Compliance, by facilitating design workshops with product managers and engineers to collaboratively define user needs and design requirements

Vsimple — Founding Product Designer

August 2020 - Feb 2022

Conceptualized a B2B workflow management platform that raised a \$2M seed round

Introduced a design system from 0→1 to quickly test and iterate ideas; ensured experience consistency across desktop, tablet, and mobile platforms

Maintained oversight of all design-related responsibilities, ranging from creating creative assets for brand and product marketing to developing the company's website from scratch using Webflow

GE Appliances — Associate UX Designer

April 2019 - July 2020

Designed creative assets for digital promotions that run on both internal and external GE Appliances e-commerce stores on a nationwide basis

Applied e-commerce UX best practices from the Baymard Institute to
