PLATINUM
SOLAR GROUP

Who are we?

Platinum Solar Group (PSG) is a leading Australian provider of solar energy solutions, specialising in the installation, maintenance, and service of residential, commercial, and off-grid solar power systems.

With a decade of industry experience, our expert electricians and solar designers are committed to delivering high-quality, efficient, and durable solar solutions across Australia.

We pride ourselves on providing tailored energy solutions that optimise performance, enhance sustainability, and reduce electricity costs. Unlike competitors, we achieve this through meticulous system design, high-quality components, and a customer-first approach that ensures long-term efficiency and reliability. As a Clean Energy Council (CEC) Approved Solar Retailer and a New Energy Tech Approved Seller, PSG ensures the highest standards of quality and compliance in every project we undertake.

SOON

Paul Iskander

Director of Sales, Operations & Business Development

Paul leads the company's growth strategy, sales performance and day-to-day operational delivery, ensuring every customer receives a seamless experience from first enquiry through to installation and ongoing support.

Paul works closely with clients, sales specialists, project teams and operational staff to develop tailored energy solutions that deliver long-term value, efficiency and customer satisfaction. His focus is on building strong relationships, improving internal processes and driving sustainable business growth across PSG's residential, commercial and energy-storage services.

Alex Kaiser

Director of Commercial Sales & Engineering

Alex bridges the gap between high-level energy strategy and technical precision, overseeing the design and delivery of complex solar solutions for commercial and industrial clients.

With a background in engineering, Alex ensures that every commercial project is optimised for maximum efficiency, structural integrity, and long-term financial return. He works closely with business owners and developers to navigate large-scale installations, battery storage integration, and energy feasibility studies, ensuring PSG's commercial division delivers industry-leading performance and sustainability.

Nathan Youssef

Projects Director / SAA GCPV & GCBS Accredited Electrician, Installer & Designer

Nathan ensures seamless project delivery and client satisfaction by overseeing project timelines, coordinating with team members, and maintaining adherence to industry standards. His efforts contribute to the company's reputation for delivering high-quality solar installations.

Simon Gilto

Projects Director / SAA GCPV & GCBS Accredited Electrician, Installer & Designer

Simon oversees on-site operations, ensuring technical precision and adherence to industry standards. His role is crucial in delivering high-quality solar installations.

Our capabilities

Residential Solar Installation

PSG provides high-quality residential solar systems designed to maximise energy savings and efficiency. Our systems have helped homeowners reduce their electricity bills by up to 70%, with many installations achieving payback periods of less than five years. Our team handles everything from design and installation to post-installation support and maintenance, ensuring seamless integration into your home's energy infrastructure.

Commercial Solar Installation

Our commercial solar solutions help businesses reduce operational costs, lower carbon footprints, and achieve long-term energy savings. For example, we recently partnered with a manufacturing facility to install a 500kW solar system, cutting their energy expenses by 40% while significantly reducing their carbon footprint. We conduct feasibility analyses, custom system design, and professional installations to optimise performance and return on investment.

Off-Grid Solar Solutions

For customers seeking complete energy independence, PSG specialises in off-grid solar systems. We design and install customised solutions that ensure a reliable power supply in remote locations, integrating advanced battery storage and backup options.

Battery Storage Solutions

We offer expert battery storage solutions that enable homeowners and businesses to store excess solar energy for use when needed. Our partnerships with industry leaders such as Tesla Powerwall, LG Chem, Alpha ESS, and Sungrow ensure high-performance energy storage solutions.

Our capabilities

Solar System Maintenance & Repairs

Regular maintenance is crucial for optimising solar system performance. PSG provides professional cleaning,

Solar Hot Water & Heat Pumps

We install advanced solar hot water and heat pump systems to help homeowners and businesses reduce their energy consumption and utility bills. Our solutions include iStore heat pumps and other high-efficiency systems.

EV Charger Installation

As a pioneer in EV charging solutions, PSG provides expert installation of cutting-edge chargers, including Wallbox and other industry-leading models. We tailor our solutions to suit residential and commercial applications, ensuring seamless integration with your existing energy system.

Our projects

Russel Lea 44KW

In Russel Lea, a growing family with high energy needs wanted to reduce their electricity bills and environmental impact. Platinum Solar Group installed a robust 44KW solar system, transforming their home into an energy-efficient powerhouse. Now, they enjoy significant savings and the satisfaction of contributing to a greener future.

Terrey Hills 24.9KW

Brad Fittler in Terrey Hills sought to cut operational costs and embrace sustainability. PSG designed and installed a 24.9KW solar system, tailored to their energy usage. The system not only slashed his energy bills but also enhanced his reputation as an eco-conscious enthusiast.

Allambie Heights 66KW

COMMERCIAL

Giraffe Childcare in Allambie Heights aimed to reduce overhead costs and improve sustainability. PSG installed a 66KW solar system, perfectly suited to their energy demands. The system has significantly lowered their operational expenses, allowing them to reinvest in their business while reducing their carbon footprint.

Winmalee 6 Tesla Powerwall 3

A family in Winmalee wanted to ensure uninterrupted power and maximize their solar energy usage. PSG installed 6 Tesla Powerwalls, providing them with reliable energy storage and backup during outages. Now, they enjoy energy independence and peace of mind, knowing their home is powered day and night.

Sans Souci 18KW

In Sans Souci, a homeowner sought to reduce their energy bills and increase their property's value. PSG installed an 18KW solar system, perfectly tailored to their energy needs. The system has significantly cut their electricity costs, allowing them to enjoy long-term savings and a greener lifestyle.

Rodd Point 17.6KW

At Rodd Point, a family aimed to future-proof their home with clean energy. PSG installed a 17.6KW solar system, perfectly sized to meet their needs. The system has significantly reduced their electricity bills, allowing them to invest more in what matters most—their family.

Our approach

THE PLATINUM 6 STEP SOLAR GUIDE

We understand that transitioning to solar power can be overwhelming; which is why we've streamlined the process to be simple & straight forward with our 6 step solar buying guide.

#1 EVALUATE YOUR NEEDS

We'll start by examining your electricity usage, household size, and anticipated future consumption trends to determine the most suitable solar system size for you.

#2 PROPOSE OPTIONS

We'll present you with a range of options with various brands, budgets and system sizes. Each option will be detailed with key information to help you in your decision making.

#3 SITE ASSESSMENT

We'll then attend your property to conduct a preliminary assessment. This will ensure our proposed options are deliverable without any unforeseen complications.

#4 ACCEPTANCE & INSTALLATION

Once approved, we will handle all permits, stock, and scheduling. After installation, we'll guide you through operating, monitoring, and troubleshooting your solar system.

#5 METER UPGRADE & SAVINGS

Post-installation, we'll coordinate with your electricity retailer to update your meter for enabling export credits. While feed-in tariffs help, you'll save the most by consuming the solar energy you generate.

#6 MONITOR & MAINTAIN

We'll provide a detailed handover document and access to the monitoring app for real-time performance tracking and energy optimisation. We look forward to helping you harness the sun's power!

Why choose us?

THE PLATINUM EXPERIENCE

1

WE ARE ELECTRICIANS

We are electricians who install systems every day; not just as a sales company. You're dealing directly with the people who know how it's built, how it works, what the best solutions are for you. We are not a middleman.

2

LEADING WARRANTIES

Most solar companies disappear or don't want to hear from you after install. We offer a dedicated service team and maintenance plans and we back our work with a long 25 year workmanship warranty so you're not left on your own.

3

PROVEN TRACK RECORD

We have installed over 3,000 systems and 50,000+ panels across Sydney with ~300ish 5-star reviews. Solar & Batteries is our speciality.

4

TRUE ONE STOP SHOP

We handle residential and commercial solar, storage, EV chargers, hot water, and off-grid systems. From panels today to batteries or chargers later, our in-house team manages your entire journey.

5

LOCAL, FACE-TO-FACE, SHOWROOM-BACKED

We are based here in Sydney (Condell Park) with a real showroom. If you ever want to see us, you know exactly where to find us; we're not a call centre in another state or another country.

6

FOCUS ON STRONG ROI

We design your system around the fastest payback, this is generally 2-4 years and then you've got 20+ years of savings. We walk you through the numbers so you can see exactly how it pays for itself.

7

NEW ENERGY TECH APPROVED

We are New Energy Tech Approved Seller, which is an ACCC-authorised program that protects you as a consumer. Not every solar company in NSW signs up for this given how stringent and strict the process is.

8

6 EASY STEPS

We've boiled a complicated and stressful journey down to a simple 6-step process. We handle everything from approvals, install, meter change and then show you how to monitor and maintain the system.

9

BESPOKE SOLUTIONS

We don't sell the cheapest gear in the market: we customise and install systems designed to last 20+ years. You get premium brands, installed to a standard we're happy to put our name on. One size doesn't fit all.

10

COMPLIANCE & INTEGRITY

We'd rather lose a sale than mislead a customer. Everything we show you is in writing, we explain all the fine print, and we're bound by the New Energy Tech Consumer Code.

OUR ACCREDITATIONS & EXPERTISE

Platinum Solar Group holds accreditations from the Clean Energy Council as solar system designers and installers. We also possess electrical, and roofing licenses. Our specialist team manages all aspects of design and installation, offering commercial and residential clients a full in-house, end-to-end solar solution.

Client testimonials

Nass Martino

2 months ago

If there was a 6th star, I'd give it. From the outset, the Platinum Solar Group team were approachable, friendly and very professional. During installation, extremely neat, courteous and respectful of our home. They got in, got it done, explained it all to me and were on their way within a few hours. Post installation they covered everything we needed to know. Completely recommend, and if you do go... reach out to Matt Chidiac and tell him Nass sent you ;) Hide
