

REPAIR
REPLACE
RECALIBRATE™

DID YOU KNOW?

Your windscreen is much more than just a sheet of glass.

It is a vital structural part of your vehicle's safety system, designed to protect you on the road.

Most modern vehicles on our roads today are equipped with safety features called ADAS (Advanced Driver Assistance Systems). These smart safety features or front-facing cameras include Lane Keep Assist, Forward Collision Warning, Automatic Emergency Braking, Adaptive Cruise Control, are mounted directly on your windscreen.

Even a minor stone chip can disrupt your ADAS systems. Furthermore, if a chip is left unattended, it can quickly spread, forcing a full windscreen replacement and a mandatory, highly technical recalibration of the ADAS camera. The ADAS recalibration is a specialised service that ensures that your safety features continue to work correctly. In a recalibration, our certified technicians will restore these smart safety features back to manufacturer specification using advanced technology. Once a recalibration is complete, we issue a recalibration certificate confirming that the recalibration service was carried out successfully.

The smart and safe move?

Repair immediately or as soon as a chip appears. Always choose a certified and accredited auto glass repairer for your safety.

A QUALITY REPAIR - QUICK, SAFE AND COST EFFECTIVE

DAMAGE ASSESSED

Expert technician will assess and advise if repairable

15-20 MIN REPAIR

With unique Technology – ART®

GLASS STAYS PUT

Windscreen safety & integrity restored
Convenient and saves costs
