

# Complex Tenant Management for Microsoft 365

Overcome the security vs. productivity trade-off—  
even in the most complex Microsoft environments.

## The Challenge: The Tenant Dilemma

Microsoft 365 forces organizations into an architectural dilemma.

Multi-tenant organizations face inconsistent configurations and the risk of cross-tenant access. Consolidated tenants lack segmentation, meaning attacks and admin errors have an extreme blast radius.

High Complexity  
Increased Risk of Misconfiguration  
Cross-Tenant Access Exposure

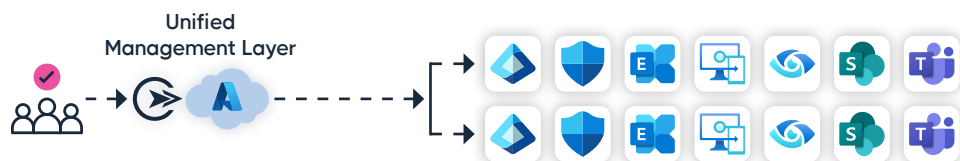

Single Point of Failure  
Extreme Admin Blast Radius  
No Testing for New Configurations

## Complex Tenant Management for Microsoft 365

Whether consolidating or managing multiple tenants, CoreView delivers the simplicity of one with the control of many.

It unifies visibility, secures consolidation through segmentation, and strengthens your environment with enterprise-grade resilience.

## What Complex Tenant Management Does for You:

**Integrate Microsoft 365 and On-Prem Environments:** Unify visibility and control by integrating tenant(s) and on-prem environments. Perform 150+ actions and push configuration changes from a central console.

**Secure with Enterprise-Grade Cyber Resilience:** Detect and remediate critical issues using built-in rules. Spot configuration drift and restore your ideal state with CoreView's backup and recovery.

**Segment Tenants and Delegate Access:** Create virtual segments to define admin boundaries. Enable least privilege access, self-service delegation, and secure consolidation.

**Automate at Enterprise Scale:** Cut admin costs and boost productivity. Automate on/offboarding, and troubleshooting—no PowerShell needed.

**Govern Tenant(s) Systematically:** Eliminate waste and enforce compliance. Identify unused licenses, control sprawl, streamline reviews, and apply lifecycle policies.

## End-to-end Coverage

### Tenant Level Configurations

### Microsoft 365 Workloads

### On-Premises Environments

### Complex Environments
