Cyber Resilience for Microsoft 365 and Entra

CoreView

Anticipate, withstand, and recover from Microsoft 365 and Entra attacks. Enforce access policies, detect tampering, secure collaboration, segment tenants, and restore configurations after incidents.

## The Challenge: Microsoft 365 and Entra Are Exposed

Despite offering amazing tools, there has never been a security challenge like Microsoft 365.

- 10,000+ configs to monitor
- Multi-tenant configuration
- No configuration backup
- Minimal visibility of access risks
- 80+ powerful privileged roles
- Limited tenant segmentation
- Rogue Entra apps
- High risk sharing and collaboration

When put together, these risks leave businesses hugely exposed to data breaches, compliance failures, and post-breach downtime.

Cyber Resilience for Microsoft 365 and Entra

CoreView gives you unparalleled visibility of your Microsoft 365 environment, showing you threats you couldn't see, remediating and managing issues and enabling enterprise grade cyber resilience.

Unified Management Layer
What Cyber Resilience for Microsoft 365 Does for You:

Enforce Zero Trust Access: Detect and auto-remediate users without MFA and Conditional Access.

Detect M365 Configuration Tampering: Detect drift across 8,000+ configuration elements in Entra, Intune, Defender, Purview, Teams, and Exchange.

Segment Tenants for Least Privilege: Create virtual tenant "segments" to enforce least-privilege access and minimize admin exposure.

Back Up and Restore Tenant Configurations: Back up critical tenant configuration settings and restore them with a single click in the event of a disaster.
Enforce Lifecycle Management: Automate onboarding, offboarding, and access reviews. Detect and deprovision unused or risky accounts and applications.

End-to-end Coverage

Tenant Level Configurations

- Entra ID
- Intune
- Defender
- Purview

Microsoft 365 Workloads

- Teams
- SharePoint
- Exchange
- OneDrive
- Copilot
- Teams Phone

On-Premises Environments

- Active Directory
- Exchange On-Premises

Complex Environments

- Multi-Tenant
- Multi-Forrest
- Power-Shell
- 3rd Party Applications

Objects Analyzed

Users, Groups, Licenses, Mailboxes, Calendars, Intune Devices, Mobile Devices, Entra Apps, SharePoint Sites, OneDrive Accounts, Teams Groups, Teams Channels, Calls, Phone Numbers, Call Queues, and Auto-Attendants.

Package	Essentials	Professional	Enterprise
Platform Security	• SSO & Auditing • SOC II & SOC III • ISO 27001/18, 9001	• SSO, RBAC, & Auditing • SOC II & SOC III • ISO 27001/18, 9001	• SSO, RBAC, & Auditing • SOC II & SOC III • ISO 27001/18, 9001
