

E Desk Installation Instructions

- 1) Download the E Desk application from the Whirlwind website or this direct link: <http://www.whirlwindusa.com/ftp/edesk/edesk.exe>
- 2) In a single user environment, double-click on the downloaded file.
- 3) In a multi-user environment, you must have administrator rights to install the file. Either log onto your computer as an administrator and double-click the downloaded file

OR

Right-click the file while holding down the “Shift” key. Select “Run As...” from the pop-up menu and enter your administrator name and password.

- 4) Follow the installation prompts.
- 5) After installation, users may have to have full rights assigned to the program folder where E Desk was installed for the program to run properly:
 - While logged in as administrator, navigate to the program folder where E Desk was installed (default is C:\Program Files\EDesk).
 - Right-click on the folder and select “Properties”.
 - Click the “Security” tab; click on “Users” from the list of names and check “Full Control” <OK>.
