The Developers should not be interrupted during the Sprint and the Sprint Goal should remain intact. These are conditions that foster creativity, quality and productivity.

(Which one the following answers is **FALSE**?)

- ☐ A. The Product Owner can help clarify or optimize the Sprint when asked by the Developers.
- ☐ B. The Developers may work with the Product Owner to add or remove work if they find themselves with more or less capacity than expected.
- ☐ C. The Sprint Backlog is fully formulated in the Sprint Planning event and does not change during the Sprint.
- ☐ D. As a decomposition of the selected Product Backlog items, the Sprint Backlog changes and may grow as the work emerges.

# Tips og tricks

(choose the best answer)

- ☐ A. Continually monitor staffing levels of the Scrum Team.
- ☐ B. Identify and remove people that are not working hard enough.
- ☐ C. Monitor the progress of the Developers on the Scrum Team.

# Tips og tricks

An organization has decided to adopt Scrum, but management wants to change the terminology to fit with terminology already used. What will likely happen if this is done?
