

Event Overview

This conference will bring together over 700 utility professionals including leaders focused on utility best practices, tools, and technologies to improve grid resiliency and reliability while meeting electrification demands; attendees will gain a better understanding of opportunities and tools available to aid in the adaptation to regulatory requirements for enabling a carbon free future

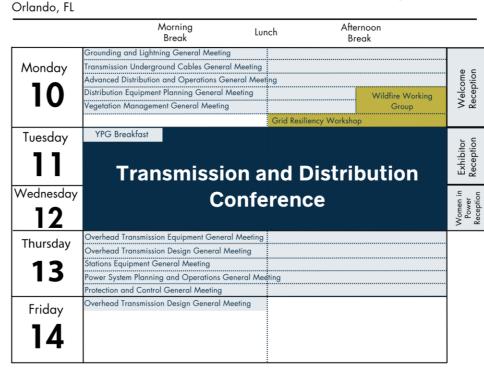

The event will feature presentations on the following themes:

- Distribution Systems of the Future
- Resilient and Sustainable Transmission Systems
- Innovations in Substations and Protection Systems
- Integrated Vegetation Management and T&D Systems
- Future-Ready Grid Planning and Operations
- Grounding & Lightning

Supported and attended by over 700 utility professionals, including:

- Transmission & Distribution Line Management Operations
- Transmission & Distribution Line Design and Planners
- Forestry and Vegetation Management
- Grounding, Protection, and Control Systems
- Stations Management
- Power Quality
- Engineering Leadership
- And more from our world-class list of utility member organizations
 - (Click to View Membership Map)

Week at a Glance: November 10-14, 2025

Supporting CEATI Member Utilities

Exelon

Alberta Electricity System Operator American Electric Power **American Transmission Company** Arizona Public Service Company ATCO Electric Austin Energy Bear Valley Electric Service California Department of Water Resources Central Hudson Gas and Electric Chelan County Public Utility District Con Edison Constellation Energy Corporation **Duke Energy** Efficiency Manitoba **Electricity Supply Board ELES** Elexicon Energy **ELMAR ENMAX Power Corporation** EnWin Utilities **EPCOR** ERCOT (Electric Reliability Council of Texas) Eugene Water and Electric Board Evergy

Eversource Energy

FirstEnergy Corporation Florida Power and Light FortisAlberta **FortisBC** Ghana Grid Company Hetch Hetchy Water and Power SFPUC Hydro One Networks Hydro Ottawa Idaho Power Company Invenergy Israel Electric Corporation Landsvirkjun London Hydro Long Island Power Authority LS Power Manitoba Hydro Maritime Electric Metropolitan Water District of Southern California Modesto Irrigation District Nashville Electric Natural Resources Canada New Brunswick Power

CEATI Transmission & Distribution Conference – Tuesday, November 11

7:00-8:30

Breakfast – Exhibit Hall Young Professionals Networking Breakfast

8:30-9:45

Welcome Plenary – all tracks

8:30

Opening Remarks – Megan Owens, CEATI

8:45

Keynote Presentation: Advancing the Energy Transformation – Nichole Owens, Baltimore Gas & Electric

9:45-10:30 Coffee Break - Exhibit Hall Session B1: Distribution Systems of Session A1: Resilient and Session C1: Future-Ready Grid Session E1: Integrated Vegetation Session D1: Grounding & Lightning Sustainable Transmission Systems the Future Planning and Operations Management and T&D Systems See the latest advancements in action with Session Chair: Gil Mourant, CEATI Session Chair: John Williamson, CEATI Session Chair: David Villa, CEATI Session Chair: Asim Haldar, CEATI live technology demonstrations 33128: A Framework for Vulnerability Al Agents: How Al Is Quietly Coming to US1k Weather Model: Accurate Forecasts Adaptation to the New Normal: A look at Satellite Remote Sensing Goes 10:30 As sessment of Line Structures and Line Run the Utility Back Office along Transmission Lines and changing grounding practices for utilities Mainstream: Experience from Mike Hejme j, Senpilot Exposures to Extreme Events -Renewables -Bryan Beske, Safearth Deployment Across the AEP Kallol Sett, University at Buffalo Keith Cavey, Meteomatics Transmission Network -Nick Ferguson, LiveEO & Erik Fletcher, Senpilot American Electric Power 11:15 33139: Design Implications for Lattice Unlocking the Power of Behind-the-Meter Al-Driven Probabilistic Weather IEEE 837: Standard For Qualifying Validating Your Network in Rural, Urban, Towers and Pole Structures Regarding Intelligence: A Collaborative Approach -Forecasting for Future-Ready Grid Permanent Connections Used in or Heavily Treed Areas -

	Foundation Service ability Limits – Dr. Han-Ping Hong, Western University	Matt Sveinbjormson, ATCO, Maria Kretzing, Bidgely, Kevin Fennell, Landis+Gyr ATCO Landis Gyr	Planning and Operations – Laura Fieselman & Janet Lee, Salient Predictions and <mark>co-presenter (TBC)</mark>	Substation Grounding – David Shibilia, nVent	Mike Parlow, Forsite & Stephen Ellis, Fugro		
12:00-1:	12:00-1:30 Networking Lunch – Exhibit Hall						
	Session A2: Resilient and Sustainable Transmission Systems	Session B2: Distribution Systems of the Future	Session C2: Future-Ready Grid Planning and Operations	Session D2: Advanced Methods in Substation Grounding	Session E2: Integrated Vegetation Management and T&D Systems		
	See the latest advancements in action with live technology demonstrations	Session Chair: Steve Greey, CEATI	Session Chair: Michael Marz, ATC	Session Chair: Jamie Forsyth, ESB Networks			
1:30	Remote Operations with Drone Solutions for Inspection and Response – Christina Park, Corey Hitchcock, Skydio	What do you get when you cross a Mammoth with a Marmot: ATCO's Innovative Response to Rebuilding with Resilience following the 2024 Jasper NP Wildfire – Matt Sveinbjomson & Trevor Tkach, ATCO Electric	Future-Proofing the Grid: Scalable Integration of Renewable Energy & Storage for Decarbonized Power Systems – Gabriel Vera, PSC Consulting	Carrying Out a Grounding Site Survey and Grounding Performance Testing at a Rural HV Substation - A Case Study – Ken Atkinson, ESB Networks	A Utility Perspective on Driving Technological and Process Change in Vegetation Management - Malek Singer, Teledyne Geospatial & Kostas Lopsaitis, Network Mapping Group		
2:15	iSIU® Enhancement for Comprehensive Utility Asset Management Green Grid	TBC	A Systematic Approach to Validating Wind Farm Protection Settings Against Utility Criteria with Different Reference Points and Evaluating Minimum Reactive Power Support – Gabriel Vera, PSC Consulting	Substation Lightning Protection Systems & Shielding Evaluation Methods – Dave Lewis, Bentley Systems & Kyle Nicholson, Duke Energy	Condition Based Vegetation Management: Aren't We Really Talking About Asset Management? – Robert Vanderhoof, Arbormetrics		
	Griding		Casherrene, recoonstants				

CEATI Transmission & Distribution Conference – Tuesday, November 11

	Session A3: Resilient and Sustainable Transmission Systems	Session B3: Distribution Systems of the Future	Session C3: Future-Ready Grid Planning and Operations	Session D3: Grounding & Lightning	Session E3: Integrated Vegetation Management and T&D Systems
	Session Chair: Brian Gallagher, ESB Networks	Session Chair: Chris Brouillard, National Grid	Session Chair: Steve Haddock, CEATI	Session Chair: John Williamson, CEATI	See the latest advancements in action with live technology demonstrations
3:45	Enhancing Grid Resiliency through Data- Driven Prioritization – Brian Sprinkle and Noah Wetherald, lapetus Infrastructure Services	Resiliency NOW! A utilities experience with rapidly analyzing and upgrading circuits to improve resiliency – Chad Newton, Osmose & Daniel Wienhold, Baltimore Gas and Electric	From Data Gaps to Grid Intelli gence: How Evergy Digitalized Its Transmission Network with AI – Chad Carsten, Evergy and Don McPhail, eSmart Systems	Ground Potential Rise Transfer Along Distribution Lines – Babak Jamali – BBA/METSCO	Building a Data-Driven UVM Program with Operational Intelligence – Liz Fulton & Max Cunningham, Asplundh ASPLUNDH
4:30	Bridging the Data Management Gap – Charles Johnson, Amidyne Solutions	Optimizing the balance of cost and risk in the management of a ging distribution infrastructure – Casey Davis, & Keli Thurston, Exponent, Michael Didyk, Pacific Gas and Electric Company	ComEd's Voltage Optimization Corrective Maintenance Program Success – Sheikh Rajib & Jason Pozen, ComEd and Kevin Flynn & Nataliya Ripinskaya, Qualitest	Safety is sues along transmission corridors crossing congested areas – Emanuel Petrache, Kinectrics	Use Your Vegetation Insights to Plan and Optimize Vegetation Work Execution End- to-End – Robbie Berglund, IBM

5:30-7:00 Networking Reception – Exhibit Hall

CEATI Transmission & Distribution Conference – Wednesday, November 12

8:30	Panel Session – All tracks
	Grid-Readiness for Electrification: How are Utilities Preparing for the Next Decade of Load Growth?

9:45-10:30 Coffee Break - Exhibit Hall

7:00-8:30 Breakfast – Exhibit Hall

	Session A4: Resilient and Sustainable Transmission Systems	Session B4: Distribution Systems of the Future	Session C4: Future-Ready Grid Planning and Operations	Session E4: Integrated Vegetation Management and T&D Systems	Session F1: Innovations in Substations & Protection Systems
	Session Chair: Emma Butler, ESB	Session Chair: Bryan Hobson, Idaho Power	See the latest advancements in action with live technology demonstrations		
10:30	Resiliency Under Load – Mark Messenger, Osmose	The Sault Smart Grid: A Scalable Model for Future-Ready Distribution Systems- Robert Brewer, PUC Services, and Gary Johnson, Black & Veatch	Strategic planning tools and systems to predict and manage EV charging demand – Will Thomas, EA Technology	Inside Integrated Vegetation Management: A Fireside Chat with Lew Payne – Nick Ferguson, LiveEO & Lewis Payne, New York Power Authority	Unlocking Substation Digitalization: A Unified Approach for the Modern Grid – Jesse Koskela, Eneryield & EcoPhi
11:15	Us e of consequence/probability risk matrices for work prioritization – Issam El Ayadi, Rosa Serrano and Matthew Horowitz, Pacific Gas and Electric,	Mitigating High-Frequency Harmonic Distortion from Utility-Scale PV Plants: A Field-Validated Approach – David Mueller, EnerNex	TBC		High Impedance Fault Detection: Optimization of the 46BC Protection Function with Residual Overvoltage Blocking – Bastian Gonzalez Aragon, Chilquinta Energia

12:00-1:30 Lunch – Exhibit Hall

	Session A5: Resilient and Sustainable Transmission Systems	Session B5: Distribution Systems of the Future	Session C5: Future-Ready Grid Planning and Operations	Session D4: Grounding & Lightning	Session F2: Innovations in Substations & Protection Systems
	Session Chair: Dan Chapoton, Duke Energy	Session Chair: Joe Zerdin, Hydro One	Session Chair: Gil Mourant, CEATI	Session Chair: Jamie Forsyth, ESB Networks	
1:30	Beyond Standard Parameters: Assessing 400 kV Line Insulation Integrity via Direct Resistance Measurement - A TAURON Utility Case Study – Michal Cicho, Sonel S.A. & Jacob Moshinsky, Stratatek	Putting DSO into action: Grid Flexibility and the Clean Energy Transition – Daniel Yung & Jeff Crompton, National Grid	Complete Grid Awareness with Today's Scalable Tech: What Changed and Why it Matters – Tom Cleaver, Heimdall Power	Future of Commissioning: Current Injection Testing – Brandon Dubrowski, Safearth	Improve Reliability Metrics by Enhancing Restoration of Recloser-Dense Distribution Systems – Amy Sinclair, Schweitzer Engineering Laboratories
2:15	Ensuring Resilience in Transmission UG Cables – Sean Bird & Emma Butler, ESB Networks	DSO implementation check: are utilities, regulators and markets ready to step up? Alex Bakulev, Eng.In Corp. and Shane Fraser, EPCOR	Using Regulatory Sandboxes to Unlock the Grid through Advanced Transmission and Distribution Technologies – Grace Relf, Lawrence Berkeley National Laboratory and co-presenter (TBC)	Probability of Ignition for De-Energized Conductors subject to Electric and Magnetic Field Induction – Reeve Dunne, Exponent & Michael Didyk, Pacific Gas and Electric	Modernizing Underground Laterals – Lea Maurer, S&C Electric

3:00-3:45 Coffee Break - Exhibit Hall

	Session A6: Resilient and Sustainable Transmission Systems	Session B6: Distribution Systems of the Future	Session C6: Future-Ready Grid Planning and Operations	Session D5: Innovations in Substation Systems	Session F3: Innovations in Substations & Protection Systems
	Session Chair: Prasad Yenumula, Duke Energy	Session Chair: Matt Sveinbjomson, ATCO Electric	Session Chair: Ranell Dedicatoria, CEATI	Session Chair: Raymond Lings, CEATI	
3:45	Panel Session – 3:45PM-5:15PM Unlocking the Grid's Potential with Grid Enhancing Technologies (GETs) Ashley Yue, ATCO Electric,	Evaluating the Impacts of Customer Load Electrification on FortisAlberta's Distribution Network – Kevin Wan, TETRA Tech and James Cooke, FortisAlberta	Enhancing Awareness of the Grid through Advanced Load Forecasting Practices – Robert Otal, Riley Prescott & Ghaz Tabrizi, BBA and Alex Bakulev, Eng.In Corp.	Developing a Lifecyc le-based Transformer Replacement Strategies: Establi shing Minimum Reinvestment Thresholds – Todd Shepherd, Asset Mana gement System Integration	Title TBC - ICF
4:30	Tyson Harper, Hardline Engineering, Georg Rute, Gridraven, Michael Craig, Great River Energy, Tiffany Menhorn, Prisma Photonics Tom Cleaver, Heimdall Power	EV Forecasting in Distribution Planning - Reza Dehghan, Eaton and Phoebe Chang, Hydro One	Investing for Impact: How Proactive Planning Unlocks Value from Electric Transportation – Will Thomas, EA Technology	The Roadmap Towards Net-Zero for HV Grids in North America: SF6-free Switchgear – Todd Irwin, GE Vernova	Simplifying Compliance: An Integrated Approach to Meeting NERC PRC-002 and PRC-005 Requirements – Amy Sinclair, Schweitzer Engineering Laboratories
