Security and support of the Service

Security

We provide support and maintain security measures for the duration of the Subscription.

We take many measures to protect and secure your data through backups, redundancies, and encryption. We enforce encryption for data transmission from the public Internet. There are some edge cases where we may send your data through our network unencrypted.

When a Subscriptions Agreement expires and the option to extend is rejected, the data will be kept for a period of 30 days, after this we delete all records and do not keep backups. Once deleted, the data cannot be retrieved, see our Privacy Policy for more detail.

New features and system upgrades

Sometimes it becomes technically impossible to continue a feature or we redesign a part of our Services because we think it could be better or we decide to close new signups of a product. Although we will always attempt to notify you about upcoming upgrades and changes in advance, we reserve the right at any time to modify or discontinue, temporarily or permanently, any part of our Services with or without notice.

Support

We provide support via email for most users of mobile Apps and will aim to respond to requests lodged within two business days. Support for users of the Portal is also provided primarily via email and will be responded to within four business hours. Users of the Simpler Manager will also receive training and ongoing communication in the form of release notes as new features are introduced.

Uptime

We aim to keep unplanned downtime to a minimum. Our systems are built on a robust infrastructure to maintain a high uptime rate. The majority of system upgrades do not require any downtime but should this be required, we will schedule it and notify you via email prior to the

scheduled downtime occurring. Where possible, we will notify you of the duration of the required downtime.

Copyright and ownership

We do not pre-screen content, but reserve the right (but not the obligation) in our sole discretion to refuse or remove any content that is available via the Service.

The names, look, and feel of the Services are copyright© to the Company. All rights reserved. You may not duplicate, copy, or reuse any portion of the HTML, CSS, JavaScript or any other source code, or visual design elements without express written permission from the Company. We reserve the right to rescind this permission if you violate these Terms of Service.

You must not modify another website so as to falsely imply that it is associated with the Services or the Company.

Features and bugs

We design our Services with care and test all features extensively before releasing them. As with any software, our Services inevitably have bugs. We track the bugs reported to us and work through priority ones, especially any related to security or privacy. Not all reported bugs will get fixed and we don't guarantee completely error-free Services.

API terms

Any use of the Headfirst/Simpler API, including through a third-party product that accesses the Services, is bound by the terms of this agreement plus the following specific terms:

- We are not liable for any damages or losses resulting from your use of the API or third-party products that access data via the API
- All API usage must be disclosed to and approved by Simpler Software
- Third parties may not access and employ the API if the functionality is part of an application that remotely records, monitors, or reports a Service user's activity other than time tracking, both inside and outside the applications. The Company, in its sole discretion, will determine if an integration service violates this bylaw. A third party that has built and deployed an integration for the purpose of remote user surveillance will be required to remove that integration.
- Abuse or excessively frequent requests to the Services via the API may result in the temporary or permanent suspension of your account's access to the API. The Company, in

its sole discretion, will determine abuse or excessive usage of the API. If we need to suspend your account's access, we will attempt to warn the account owner first. If your API usage could or has caused downtime, we may cut off access without prior notice.

Liability

We shall not be liable, in law or in equity, to you or to any third party for any direct, indirect, incidental, lost profits, special, consequential, punitive or exemplary damages, including, but not limited to, damages for loss of profits, goodwill, use, data or other intangible losses (even if the Company has been advised of the possibility of such damages), resulting from: (i) the use or the inability to use the Services; (ii) the cost of procurement of substitute goods and services resulting from any goods, data, information or services purchased or obtained or messages received or transactions entered into through or from the Services; (iii) unauthorised access to or alteration of your transmissions or data; (iv) statements or conduct of any third party on the service; (v) or any other matter relating to this Terms of Service or the Services, whether as a breach of contract, tort (including negligence whether active or passive), or any other theory of liability.
