

Superwinch Wireless Remote Control Kit

Providing more freedom to control your winch up to 50 metres away, whether inside the vehicle, beside the boat trailer, or from a better vantage point, the Superwinch wireless control delivers effortless convenience.

Works on all winches with a solenoid, and features a textured hand grip with safety strap, and an automatic shut-off timer and protection against accidental power-ups. The Superwinch Wireless Remote is easy to use and tough to withstand knocks and drops.

- 15M / 50ft range
- For winches with a solenoid
- IP69 receiver
- Large buttons, easy to use.
- Instant operation
- Includes lanyard and belt clip
- 1M wiring loom (receiver)
- Traxion 1 Year Warranty

Part No.	Voltage
2277R	12V
2278R	24V

Wireless Remote Control Wiring and Operating Instructions

Wiring Connections

Disconnect the winch from the battery before beginning.

Check winch voltage (12V or 24V) matches Wireless Remote Control voltage.

Receiver Wire	Solenoid Terminal Connection
RED	Red stud terminal on solenoid
BLACK	Centre spade terminal on solenoid
BLUE	Outside spade terminal on solenoid
WHITE	Outside spade terminal on solenoid

Terminal Function
Battery +ve positive
Battery -ve negative

Nb: Blue and White wires may be swapped to suit winch direction.

Once above connections are made, re-connect the battery. Freespool approximately 2m of rope off the winch drum and carefully test the wireless.

Remote Control Operation

Turn ON	Simultaneously press and hold the IN and Out buttons for 3 seconds. The remote LED will glow solid RED.
Turn OFF	Simultaneously press and hold the IN and Out buttons for 3 seconds. The RED remote LED will go out.
IN/OUT	The winch will run while the corresponding button is held depressed. The remote LED will flash RED rapidly.
Auto OFF	The wireless will shut down automatically after 2 minutes without operation.

Remote Control Battery

The remote control uses 1 x CR2450, 3v lithium button battery.

To change the battery, remove the 4 x cover screws, slide the battery out of the holder using a non-metallic rod.

Push the replacement battery into the holder with the positive side facing up. Reinstall the cover.

Auto Off The wireless will shut down automatically after 2 minutes without operation.
