

BDA | Irish Building & Design Awards | 2026

13th March 2026

Celebrating the best in architecture, engineering, construction, design, innovation
and the future of the Irish Built Environment

ABOUT US

Established by Commercial Media Group the leading provider of online training courses and conferences, and with over 15 years' experience as award organisers.

The Irish Building & Design Awards (IBDAs) celebrate the best in architecture, engineering, construction, and design across Ireland. Launched by CMG Events, these prestigious awards have been a cornerstone of the built environment industry for over a decade, recognising excellence, innovation, and sustainability across every facet of the sector.

Since their inception, the IBDA have honoured leading architects, developers, contractors, engineers, and designers, as well as standout projects that shape the physical and cultural landscape of modern Ireland. From large-scale infrastructure and landmark commercial builds to bespoke residential design and green innovation, these Awards spotlight both the people and projects driving Ireland's built future forward.

Each year, entries are submitted from across the country, representing the depth and diversity of talent within Ireland's construction and design communities. With an independent judging panel of industry experts, the Awards maintain a rigorous, transparent, and respected evaluation process.
